Nicholas P. Miller, Esq.
Miller & Van Eaton, P.L.L.C.
1155 Connecticut Avenue, NW, Suite 1000
Washington, DC 20036-4320

Dear Nick:

Based on the recent "status report" that the McAllen Independent School District ("MISD") filed with the Federal Communications Commission ("FCC"), Time Warner Cable ("TWC") understands that the internal network wiring configurations in certain municipal buildings and schools may be inadequate to receive the public, educational, and governmental ("PEG") programming at the currently-assigned digital channel locations. TWC has worked to avoid these kinds of issues by reaching out to local governments and school districts months in advance of the digitization of PEG programming to identify locations where the cities desired digital converter boxes and to uncover any problems. However, neither MISD nor the City of McAllen provided TWC with lists of such locations until after they filed suit and complained to the FCC, and the issues raised in MISD's status report were only recently uncovered during the long-delayed walk-outs.

The QAM frequency assignments where TWC had planned to carry McAllen's and MISD's digital PEG programming are the same frequencies where TWC has simulcast the programming in digital format for approximately two years without incident or customer complaints. Had the problems created by the inadequate internal wiring at certain facilities been identified earlier, TWC could have earlier proposed to mitigate any such problems by relying on a digital QAM frequency at the existing location of the analog frequencies used to transmit the PEG programming.

Despite the delays by MISD and the City of McAllen, TWC is still prepared to implement this solution. Because TWC has already notified the public of the QAM assignment for the McAllen PEG programming following the transition, however, TWC proposes to simulcast the digital PEG programming at both QAM

Hogan Lovells US LLP is a limited liability partnership registered in the District of Columbia. Hogan Lovells refers to the international legal practice comprising Hogan Lovells US LLP, Hogan Lovells International LLP, Hogan Lovells Worldwide Group (a Swiss Verein), and their affiliated businesses with offices in: Abu Dhabi Alicante Amsterdam Baltimore Beijing Berlin Boulder Brussels Caracas Chicago Colorado Springs Denver Dubai Dusseldorf Frankfurt Hamburg Hanoi Ho Chi Minh City Hong Kong Houston London Los Angeles Madrid Miami Milan Moscow Munich New York Northern Virginia Paris Philadelphia Prague Rome San Francisco Shanghai Silicon Valley Singapore Tokyo Warsaw Washington DC Associated offices: Budapest Jeddah Riyadh Zagreb

assignments for 30 days, and to provide newspaper notice to the public of the new QAM assignments (which will be placed in the frequency range that the analog PEG programming currently occupies). TWC proposes to move forward with this solution upon transitioning the McAllen PEG programming to digital-only format. TWC is also prepared to work with other cities and school districts to find the best solutions if similar problems are found – as TWC has done with other cities that have been working cooperatively with TWC.

Finally, TWC personnel have been advised by MISD personnel that TWC will be permitted to walk-through McAllen school buildings only from 4:00 p.m. to 5:00 p.m. on weekdays. TWC is attempting to confirm with higher-level people at MISD, but obviously, this will further delay completion of the installation of boxes.

Sincerely,

Gardner F. Gillespie
