Benefits to the FCC & USAC

Provides the Model for No-Cost, Technology-Driven, Fraud-Free Foundation on Which Broadband Program Can be Deployed.

Solves the Self-Certification Documenting Dilemma, the Cumbersome Annual Certification/Verification Process, and the E-Signature Discussion.

Platform will Automate Much of the USAC (and State) Audit Process:

- Audits Can Now be Targeted and Data Driven; Focus on Aberrations vs. Previous Random Approach.
- Complaints will be researched/analyzed/verified via databases vs. taken as gospel and acted on.

The Statistical Data Available Through the Platform Will Drive Great Efficiencies in The Low Income Program:

- Urban vs. Rural; Qualifying Programs; End User Movement; Desired Service Offerings; Effective Communication/Outreach Channels; Denial Reasons. Ultimately, It Will Measure the Current Levels of Fraud.
- Assists the FCC considerably by Providing Near-term Stats Relative to Actual Fraud, Attempted Fraud and Fraud Avoided, resolving the primary argument against the Low Income Program.
