ref: 63.71 Application of Open Range Communications

We have been very pleased with their service & hope you vote to keep them in business. Rural areas greatly need this kind of service. Its reasonably priced, reliable, & very customer service oriented

Hardship

Currently, we can telecommute & use this service at home to do our jobs. When it snows in Denver, we can stay at home & still do our jobs with the Federal Government.

Its a safety issue to avoid snow & ice on the roads in the winter. It also saves on gas & pollution to have this service.

We would be greatly impacted by not having this for our community. Please keep them in service & work out a long term arrangement with them for the sake of all of us in a larger state. Rural folks need them!!

Thank

Pat Kelly
