

10/4/19

To the FCC,

I, and my family, says “NO” to the approval of the OTARD rule to allow wireless companies to install their powerful, dangerous antennas on private homes and apartment buildings across the country.

There are now over 14,000 medical studies that tie 4G and 5G frequencies to medical disease, you are purposely ignoring this extensive human health research – you are assaulting us, our infants and children, pregnant women, cardiac and cancer patients, diabetics, etc. Many, many human beings, animals, birds, insects, bees and trees will have serious complications of your corrupt behavior with this roll out of 5G!

4G and 5G wireless radiation is devastating many insects, birds, and wildlife - it is affecting the bee populations, and other pollinators as well - this will impact greatly on our food supply. Do you care if we lose all of our pollinators? Here is a very clear report of this phenomenon:

“Botanist Report Links The Pulsed Microwave Radiation Emissions of Wireless Networks To The Disappearance and Exodus of Song Birds, Bats and Insects in Mt. Nardi”:

ehtrust.org/botanist-report-links-increasing-amounts-of-electromagnetic-radiation-and-species-disappearance

YOU MUST STOP ALL 5G INSTALLATIONS RIGHT NOW!

We are **NOT** agreeing to this massive increase in wireless radiation in our communities. To allow these 5G towers to be placed on homes near us without our approval is to commit criminal assault. The placement of these antennas subjects nearby residents to 24/7 radiation exposure without their consent and constitutes assault on their persons.

FCC, you must not approve this OTARD rule, instead start investigating the public health and environmental impacts of 4G and 5G!

Go to www.ehtrust.org and read the entire website – it is full of documentation of the Telecom wireless crimes against humanity, and the entire biosphere.

STOP ASSAULTING US WITH 5G!
