To whom it may Concern:
In reference to docket # 13-86, the proposal to relax obscenity laws in regard to network television programs. Please no further retrograde in this area so vital to the public. Smut is already infiltrating the Cable television and network programming is already sex- and obscenity saturated. What public good would it do to pour more of this onto our Children? We no longer will consider purchase of Cable, and now Voila! it Cometh to your home television family programs. Please enforce current obscenity laws and do not allow further degrading of public television. Do your job to protect our eyes and ears from this sort of smut. Thank you

Yours truly

Marv & Carol Baerenwald
