Re: Favor Net Neutrality
Favor Regulation Verizon, Comcast, etc

Dear Sir or Madame:

Net neutrality has allowed the internet to grow along with the development of companies such as Facebook and Google. It should be preserved. Verizon, Time Warner Cable, etc are monopolies that want to increase their profit margin at the expense of the public.

They should be more strictly regulated. Verizon et al. have no interest in protecting the public. They provide slow service and at the highest rate in the world. Granting them even more power by abandoning

net neutrality would only make them more irresponsible to the public

Sincerely,

Joseph M. Ryan
