FCC Mobility Fund

Project Description Status for CT 42103950201

1 Project Summary

1.1 Background

The FCC Mobility Fund project is designed to improve coverage to underserved populations (roads) as part of a federal program to expand broadband coverage of unserved road miles with 3G/4G (3G = 200kbps/50kbps DL/UL) through rural America. T-Mobile was awarded funds to build approximately 122 sites across 17 census tracts in this two year program.

Funding Disbursements from FCC will be in THIRDS

- First 1/3 upon project awarded to T-Mobile (effective May 24, 2013)
- Second 1/3 upon demonstrating coverage of 50% of the awarded eligible roadmiles
- Last 1/3 upon demonstrating coverage of all eligible road miles awarded

1.2 Summary for CT 42103950201

Provide broadband coverage for 88.15 road miles from a total of 88.40 road miles. T-Mobile will build 3 sites with planned census tract coverage of 99.8% of the total road miles per the FCC MF grant.

2 Project Status

Network Deployment - Network Design	-	Completed
Network Deployment - Deployment	-	In progress. Two leases signed.
Network Deployment - Construction	-	1 site market Construction Started
Network Deployment – Maintenance	-	Not started. Planned 06/25/2015
Project Budget Status	-	On track
Project Plan Status	-	On track
