Ref: Comcast Merger

I have been a Comcast customer for over 15 years and I am very concerned about a possible merger.

For the past year I have had a bundled rate for phone, cable and WIFI. As a retiree, I don't know how much longer I can afford their rates.

When my currente rate ends in June 2015, my monthly

will be $195 - $200 per month.
I do not have HBO or any premium channels and my only internet use is with a tablet so that I can email my grandchildren. My cable and WIFI are my entertainment and connection to the world but it is very hard to afford on social security.
Our area needs competition <u>not</u> a merger.
I hope you will consider the needs of people who have limited discretionary funds when making a decision.

Respectfully,
Cynthia J. Cheney
