WVVA.net News

- GigaVoice Phone Services
- [illegible] to Eliminate Small Businesses. It has to

www.wvva.net/?page_id=1278

What you see is what you pay! No additional fees! No modem rental!

Compare us to DSL: Frontier offers "up to 6Mbps" for $19.99. HOWEVER, you have to also purchase a "qualified" phone plan, which at minimum makes your bill around $60/month! (PLUS additional fees including USF, modem rental, 911 tax, and other mystery surcharges/taxes). Who needs a landline phone in 2014? Have a cell phone? Then ditch that landline and get almost double the speed for LESS money with Tier 3 service, or save more than $30/month with our Tier 2 service.

GigaBeam Plans	Download Speed (max)	Upload Speed (max)	Price/Month
Tier 1	2Mbps	1Mbps	$25
Tier 2	4Mbps	2Mbps	$40
Tier 3	10Mbps	3Mbps	$55
Tier 4	15Mbps	5Mbps	$70

* $49 installation fee with a 1 year user agreement. $99 installation fee with monthly subscriber agreement

Billing options:

- Standard: Autopay via credit/debit card – FREE
- Emailed invoices and pay by due date (pay by mail, at one of our sales offices, by phone or online!) – FREE
- US Mail paper invoice: $1/month

Modem provides connection to 1 computer only. Ethernet card required. In order to share internet with other computers a router may be needed. Certain restrictions may apply. Speeds may vary.

Note: WVVA.net Wireless Broadband requires a near line of site (nLOS) connection from your location to one our access points. Not all locations will be serviceable. Not all packages/speeds available in all areas. If you are within our coverage area, we will do a site survey to insure that quality service is available to your location.
