Re: Promoting Technological Solutions to Combat Contraband Wireless Device Use in Correctional Facilities, GN Docket No. 13-111, WT Docket No. 10-4, ET Docket No. 08- 73, RM-11430

On October 2, 2019 Prelude's representatives, as well as others met with representatives of FCC to discuss the above-referenced proceedings, provide an industry update and discuss alternatives technologies, solutions and legal structures, which will support preventing contraband communications devices used by offenders incarcerated in prisons. A list of meeting attendees is attached.

We are confident that an effective and affordable solution is now available to solve this this problem after ten years which is in line to support correctional agencies budgets, ensure that legitimate uses of cellular devices in the area of the prison are not hindered, and operating under the current legal regulations, protecting the service providers supporting the correctional industry. During the telephone meeting, the parties discussed the recent April 2019 Task Force on Contraband Phones, focusing on Geofencing solutions.

Please do not hesitate to contact the undersigned with any questions.

Sincerely,

David Gittelson
President Prelude
