This is in reference to the proposed merger of Time-Warner/Comcast #14-57 and that of DTV+AT+T - #14-90 concerning the RFD Channel.

I was alerted to the problem last year when my sister in N. Mex. went to check an RFD program I'd suggested. She has cable and found the channel had disappeared - "Poof" like magic - no forewarning. Her comment was - "no matter who I call or when I never get any satisfaction about anything!" Her thoughts are of total disgust with the cancellation of a channel in the [illegible]-CO area both rural & urban.

DOCKET FILE COPY ORIGINAL

I sincerely hope that someone (s) in your so-called URBAN areas can venture out of your closets full of urban mothballs and get a breath of fresh air and pay attention to all manner of people who enjoy the wide variety of programs on RFD channel(s). I have DTV and enjoy when I have time, the outdoor, music, entertainment programs. I especially try to catch some of the very good horse trainers for tips on working with my own horse. The FFA and 4-H is popular in this area as are some school programs related to getting URBAN kids out to farm and other outdoor programs - care of animals & raising of food for both livestock and people. The Toy Trains program reflects guys - many urban with that hobby - like a group of urban men locally here. Oh, and I highly recommend RFD coverage of the Rose Bowl Parade with less people and ad interruptions - far and away the best. So many of the programs are informative and enjoyable no matter where you live as long as one has an open mind not locked in by a brick + mortar attitude.

I sincerely hope the RFD channel (s) will continue and even expand in the future.

Thank you,

Sincerely,
Cindy Kulig
