Re: **Federal-State Joint Board on Universal Service Lifeline and Link Up**
CC Docket No. 96-45; WC Docket 03-109; WC Docket 11-42

Dear Chairman Genachowski,

Thank you for your leadership in addressing issues affecting the Lifeline program at the March 3rd FCC meeting. During these challenging economic times, Lifeline and similar programs are extremely important to my constituents and their families in the Cincinnati, Ohio area.

I applaud your efforts to both increase participation in these programs, and to eliminate any fraud or waste. Indeed, many of the FCC's proposed reforms were both reasonable and, I believe, ultimately beneficial to both the LifeLine program and its users. There are however, three proposed modifications to the program that I believe would have a negative impact on the users of Lifeline services.

The FCC proposed a "minimum charge," either a monthly fee or one time enrollment fee, to participate in wireless Lifeline programs. In addition, the FCC recommended the elimination of "self-certification" in the Lifeline program. I do not support either of these proposals.

These proposals, especially when combined, present a tremendous barrier to entry into program. This unnecessary barrier is aimed at the type of end user these programs should be reaching out to, and have been reaching in recent years. To both require that someone prove they are low income, and additionally require them to pay a fee to receive services that their poverty qualifies them for, is unreasonable. These programs have been successful in recent years because they are both free and easily accessible to the average qualifying consumer. If the FCC's recommendations are adopted, the program's effectiveness will be greatly diminished.

I also have great concern about the FCC's recommendation of capping support for the low-income portion of the Lifeline program. To do so would again strike at the heart of what has made Lifeline more successful in the past three years than in the over twenty-year life of the program. Much of the rise in participation in the Lifeline program has been due to the "great recession" which has caused a great burden economically for many in this country and specifically in Southwest Ohio.

Again I am extremely supportive of the FCC's efforts to modernize the Lifeline program. There are some thoughtful proposals that were put forward which will strengthen and streamline the program. However, on behalf of my constituents, I feel strongly that the recommended usage fees and the elimination of "self-certification" procedures will cripple an important federal program at a time when it is needed the most.

Thank you for your leadership in addressing the issues with these critical programs. I look forward to observing the ongoing rulemaking process.

Sincerely,

State Representative Denise Driehaus
Ohio General Assembly
