Challenges on Tribal Lands

- Per capita income: 25% of U.S. average
- High unemployment: 40-50% on Navajo (NTTA)
- 40% of population, and 46% of children, below poverty line
- Low population density: tribal lands SBI serves have approximately five people per square mile
- Huge distances from health care, first responders, towns, schools, all make mobile service critical
- Inaccessible landline connectivity – 94% of SBI cell sites use microwave due to high cost or unavailability of landline

SBI's Success on Tribal Lands

- 2000: Sites along highways; no Lifeline subscribers; 30% household penetration
- 2011: Over 100,000 customers, of which over 56,000 are Lifeline. Household penetration significantly improved, to be validated by 2010 Census. 175 employees, over 150 sites, major upgrades scheduled for 2012.
- 2000: Wireless voice service on Navajo, Hopi, Zuni, White Mountain Apache limited to some interstate highways and major towns.
- 2011: Wireless voice service available throughout most of the areas where tribal residents live, work and travel.
- 2000: 200 minutes of limited access analog service available to Lifeline subscribers.
- 2011: 600 minutes of digital (2.5G) service, and wider local calling area available to Lifeline subscribers, at same price point. Modern phones, including Nokia e75 and Samsung Galaxy S now available.

In Qualifying Low-Income Tribal Households, Lifeline Support Should be Provided "One Per Adult"

- Applies only to tribal households below the federal poverty threshold.
- Extraordinary circumstances outlined in SBI comments – one line in a household insufficient from health/safety perspective.
- Households above poverty line remain one per residence.
- Estimated $25 M per year in increased Lifeline nationwide.

Clarify One Per Residence Rule for Hogans on Navajo Lands

- Several hogans or trailers may be located in desert. Some are connected like apartments, others are campus-style. Many have no direct road access.
- There is no U.S. Postal Service address for many housing developments on Navajo (March, 2011 letter attached).
- Where multiple Navajo families live in a single Hogan, or in a campus-style arrangement, each family must be eligible for Lifeline benefits.
- Self-certifications used to establish tribal residence can be extended to cover living arrangements/one per residence/one per adult rules.

Targeting Support to Tribal Lands Most in Need

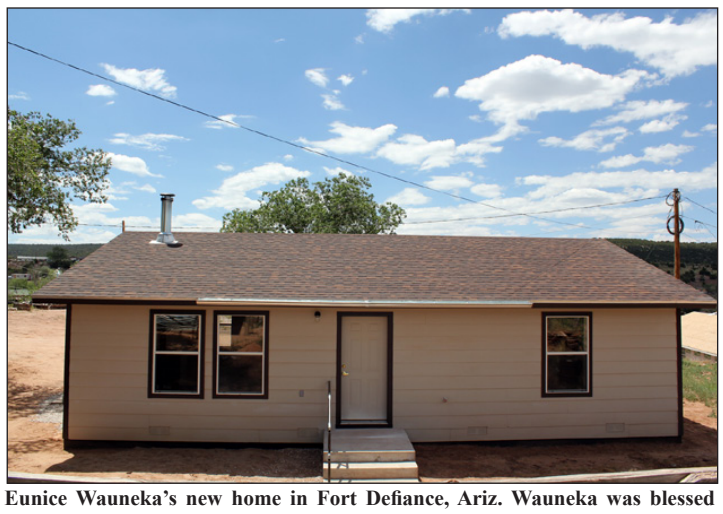
- Many tribal areas are in or near urban/suburban areas that do not experience extraordinary poverty or lack of access to telephone service.
- Enhanced Link Up for tribal lands should only be available on tribal lands that the FCC identifies as failing to meet its performance objectives for Lifeline.
- Performance goals similar to those identified at paras. 35-37 of the March 2011 NPRM can be used to determine where enhanced Link Up benefits should be made available.

Questions

Navajo elders rest easy inside new homes funded by ARRA

Nellie Lee of Rocky Ridge, Ariz listens to instructions from Housing Improvement Office staff on the care and maintenance of her new two-bedroom, one-bathroom home. (Photo by Rick Abasta)

Betty and John Nez of Mexican Springs, New Mexico were extremely thankful and appreciative of the new home they received in July 2011. The elderly Navajo couple previously lived in crowded housing conditions and now have enough room to stretch out in comfort. (Photo by Rick Abasta)



Eunice Wauneka's new home in Fort Defiance, Ariz. Wauneka was blessed twice in the same day, first with her home and second, with visiting dignitaries, including Navajo Nation President Ben Shelly, First Lady Martha Shelly, Community Development Director Arbin Mitchell and Bureau of Indian Affairs Navajo Area Director Sharon Pinto. (Photo by Rick Abasta)

Far left, the rugged terrain of Hard Rock, Ariz. Left, the new home of Betty Burbank, Blue Gap, Ariz. elder. Above, Charlie and Helen Begay of Pinon, Ariz. hold their certificate of home ownership. Top, Construction workers from the Chinle Agency share a private laugh. Below, previously, elders were living in dilapidated hogans like the one below in Pinon, Ariz. (Photos by Rick Abasta)

Alice Willie of Pinon, Ariz. received the keys to a new two-bedroom, one-bathroom home in June 2011. Willie was one of 22 lucky new homeowners from funding provided by the American Recovery and Reinvestment Act, which housed the neediest of the needy on the Navajo Nation and brought temporary employment to a workforce of 50-plus carpenters. (Photo by Rick Abasta)

Betty Burbank of Blue Gap said she was happy with her new home. Burbank spends her free time at the Cottonwood Senior Citizens Center and previously lived in substandard housing. (Photo by Rick Abasta)

RE: **NAVAJO NATION RURAL ADDRESSING**

Dear Sir:

The Navajo Nation is a Native American-governed territory covering 26,000 square miles of mostly rural and remote parts of northeastern Arizona, southeastern Utah, and northwestern New Mexico. This represents the largest land area assigned primarily to a Native American jurisdiction within the United States. The most recent available census date (2004) reported 173,987 Navajo citizens (58% of all Navajos) living on the Navajo Nation's territory, reflecting a density of about 7 persons per square mile.

I am writing to provide you with some general background on the Navajo Nation's ongoing efforts to establish a jurisdiction-wide uniform system of rural addressing for our citizens. Today, the Navajo Nation contains substantial areas where the United States Postal Services addressing system is not in place. That is, many Navajos live in areas with no formal address. They receive no services from the Postal Services in these areas. Mail is picked up at a post office box located at the nearest town with a post office. Often that town is many miles from home. The lack of formal addressing is made worse each year as the Navajo population continues to grow. Difficulties implementing the nation's 911 and E-911 systems pose a serious health and safety problem for Navajo citizens living in areas without formal addresses.

In 2008, to help address this problem and to support implementation of an effective E-911 system, the NNAA was established. The NNAA was intended to be a permanent organization that would institutionalize the processes needed to create a universal rural addressing system and to maintain and integrate the required databases to support E-911 deployment (Geographic Information System ("GIS") Master Street Addressing Guide ("MSAG"), for E-911).

In April 2009, the Navajo Nation formally adopted a plan to complete rural addressing over a three-year period. As part of this plan, NNAA has established relationships with all Navajo Nation Chapters. Each Chapter is responsible for identifying livable dwellings, labeling the type of dwelling, (Hogan,Trailer, Frame Built, etc.), and providing this information to the NNAA who, for every dwelling, is then responsible for mapping out and assigning an address and providing address signage.

The NNAA must also create street names for any road (dirt or other) with 4 or more dwellings on the road. While significant progress has been made toward completing this effort, the process is currently under-funded and so far only 10 out of 110 Chapters have provided NNAA the information it needs to complete the addressing plan. Nevertheless our efforts ae continuing as we look forward to the benefits of better emergency response and improved services generally that will flow to our residents and communities when the plan is finally completed.

If you should have questions about NNAA's effort, I would be more than happy to talk with you further.

Sincerely,

Arbin Mitchell, Division Director
