Re: WC Dkt. Nos. 13-97, 04-36, 07-243, 10-90 and CC Dkt. Nos. 95-116, 01-92, 99-200

Dear Ms. Dortch:

Attached is the December 25, 2013 report filed on behalf of SmartEdgeNet, LLC (dba Edge Communications) ("SEN") pursuant to paragraphs 99 and 103 of the *Notice of Proposed Rulemaking, Order, and Notice of Inquiry,* 28 FCC Red 5842 (2013), in the above captioned proceedings. In particular, the Commission required trial participants, such as SEN, to begin filing monthly reports sixty days after their requests for direct access to numbers from a numbering administrator that contain (1) the total of new numbers placed in service; (2) the total number of port-in requests, including existing as well as new customers) and the percentage of successful port-ins; (3) the number of port-out requests from a number held directly by the trial participant and the percentage of successful port-outs; (4) the total number of routing failures and the causes of such failures; and (5) a description of any billing or compensation disputes. SEN first submitted its request for direct access on July 27, 2013. Accordingly, SEN submitted its first report on September 25, 2013, its second report on October 25, 2013 and its third report on November 25, 2013.

The trial is now complete. It was without issues. Access to number resources allowed SEN direct contact with the originating/terminating carrier thereby affording SEN more efficient control of the resources, which allowed it to better serve its customers at a lower cost.

Please direct any questions about this report to the undersigned.

Respectfully submitted,

Randall B. Lowe
Attorney for SmartEdgeNet, LLC

EDGE COMMUNICATIONS

12/25/13 Number Access Report of SmartEdgeNet, LLC ("SEN") (dba Edge Communications)

As of 12/25/13, (1) the total of new numbers placed in service is zero; (2) there were three successful port-in requests and the percentage of successful port-ins is therefore 100%; (3) there are no port-out requests from a number held directly by SEN and the percentage of successful port-outs is therefore zero; (4) there have been no routing failures; and (5) there have been no billing or compensation disputes.

SEN has completed its negotiations with Smart City Telecom for Celebration, FL, AT&T for Celebration, FL, Key West, FL and Dallas, TX and Verizon for Celebration, FL. It has been unable to complete its negotiations with CenturyLink for Celebration, FL because CenturyLink insists as a matter of "policy" that SEN purchase separate trunks from CenturyLink even though separate trunks are not required. As a result, CenturyLink end users are not able to terminate calls to SEN end users.
