Re: ***Advanced Methods to Target and Eliminate Unlawful Robocalls,***
CG Docket No. 17-59

Dear Ms. Dortch:

On December 28, 2018, I met with Eric Burger, the Commission's Chief Technology Officer. As representative for LucidTech, I voiced our continued support for the Commission's ongoing efforts to address malicious and harassing robocalls, and our appreciation for its recognition of the importance of restoring trust in voice calls.

We discussed LucidTech's commitment to the elimination of unlawful and nuisance robocalls, as well as LucidTech's role in creating solutions to address the problem to date. LucidTech shared its position regarding the necessary steps required to support tracebacks in an effective and timely manner as STIR/SHAKEN is deployed.

We also discussed the IETF draft of *A Session Initiation Protocol (SIP) Response Code for Rejected Calls*, as it related to LucidTech's work both in the areas of the 'Know Your Customer' initiative as well as the facilitation of the sharing of key information in order to support the traceback functionality.

Finally, LucidTech shared its perspective on the pros and cons of the TN-PoP approach, as well as the sensitivities of the timeline of any solution that might be required in order to ensure that business and policy aspects of the support of solutions kept pace with the technical roll-out of STIR/SHAKEN.

Ms. Marlene H. Dortch
