

FCC FILING

13-184

Funding through the E-Rate program in Category 2 (Wi-Fi and Internal Connections) is very important to our school district. We would not be able to replace these funds if they became unavailable. Our school district has consistently relied on E-Rate program funding for many projects over the last four years. We are also planning to use the additional funds that remain for more upgrading of our wireless infrastructure. We anticipate that the connectivity provided by this infrastructure will help our students continue to be successful using mobile devices in the process of their learning.

Please continue to consider the importance of providing funding via the E-Rate program for schools that need the program to provide for our students.
