PETITION FOR LEAVE TO AMEND

Bible Broadcasting Network, Inc. ("BBN"), applicant for a construction permit for a new educational FM station at Conway, Florida, by its attorney, hereby respectfully requests the Presiding Judge to grant it leave to amend its above-referenced application (File No. BPED-890412MJ) as set forth herein.

This amendment is being filed pursuant to paragraph 15 of the Hearing Designation Order, DA 92-224, released March

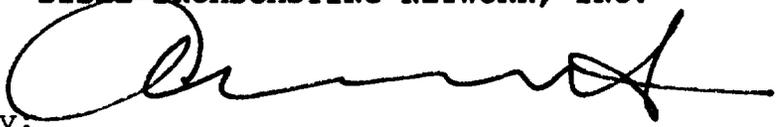

10, 1992, which ordered BBN to submit an amendment to its application which explains how workers, authorized access to the site, will be protected from levels of radiofrequency radiation in excess of the American National Standards Institute (ANSI) limit.

The amendment consists of a replacement page 11 to the Engineering Report of August 1990, submitted with the original application which provides information on radiation protection.

WHEREFORE, good cause having been shown, BBN respectfully requests the Presiding Judge to grant it leave to amend and accept the attached amendment to its pending application.

Respectfully submitted,

BIBLE BROADCASTING NETWORK, INC.

AMENDMENT

The above-referenced application of Bible Broadcasting Network, Inc. ("BBN"), applicant for a construction permit for a new educational FM station at Conway, Florida, is amended by submission of the attached environmental assessment required by 47 C.F.R. § 1.311.

Executed this 4th day of April, 1992.

Respectfully submitted,

BIBLE BROADCASTING NETWORK, INC.

By: 

Lowell Davey
President

The FM Broadcast facility proposed in the referenced application will not result in human exposure to radiofrequency radiation in excess of the applicable safety standards specified in Section 1.1307(b) of the Commission's rules.

RADIATION PROTECTION: This proposal has been evaluated for compliance with FCC guidelines concerning human exposure to radiofrequency radiation. The standards employed are detailed in OST Bulletin No. 65, October, 1985.

Table 1 of Appendix B was employed for the initial study concerning FM broadcast radiation protection.

For the effective radiated power and type of antenna proposed, the minimum antenna radiation center above ground is specified as about 11 meters. This application proposes an antenna height above ground of at least 438 meters. Therefore, full compliance with the guidelines is attained by the instant application.

In addition to the protection afforded by the proposed antenna height above ground, the facility is properly marked with signs, and entry to the facility is restricted by means of locked gates.

In the event work would be required in proximity to the antenna, or on the tower structure, such that the person or persons working in the area or on the tower would be potentially exposed to fields in excess of the ANSI guidelines, the FM facility will reduce power, or cease operation during the critical period.

CERTIFICATE OF SERVICE
