Re: ET Docket No. 14-165 and GN Docket Nos. 12-268 and 14-166 Via Electronic Filing

Dear Chairman Pai, Commissioner Clyburn, Commissioner O'Rielly, Commissioner Carr, Commissioner Rosenworcel, and Ms. Dortch,

On behalf of The Shotgun Players theatre, located in Berkeley, CA, that provides approximately 190 performances per year to 16,000 audience members and education programs to 15 students, I write with concern about available spectrum and protection for our wireless microphones and backstage communications devices.

Shotgun Players is a company of artists determined to create bold, relevant, affordable theatre that inspires and challenges audience and artist alike to re-examine our lives, our community, and the ever-changing world around us.

We strongly support the Commission's proposal to expand Part 74 license eligibility to include persons and organizations that can demonstrate the need for professional, high-quality audio and have the capability of providing it through conscientious use of wireless microphones. We support and endorse the Comments filed in these dockets by The Performing Arts Wireless Microphone Working Group.

Professional performing arts organizations hold thousands of performances each year, and wireless microphones are essential to producing high-quality performances while mitigating significant public safety concerns. Professional wireless capability, with successful interference protection, is essential to our sector.

The Shotgun Players currently uses wireless lavalier microphones for actors who perform with musical accompaniment, and a Clearcom system with headsets and handsets for stage management.

I would urge the Commission to grant a Part 74 license if an applicant can provide certification of:

- A mission statement of providing performing arts to the public;
- A history of professional-quality wireless audio presentations to audiences without interference;
- Technical guidance and frequency coordination by qualified professionals (active in audio engineering who have academic degrees or equivalent professional experience and who are familiar with radio-frequency coordination);
- A commitment to register for protection only the frequencies, times, and locations actually needed; and
- A practice of keeping logs of all wireless microphone uses, including frequencies, for all performances.

Performing arts organizations provide demonstrable service to the public in improving quality of life; preserving our cultural heritage; and providing education, enlightenment, and entertainment. They also contribute to local economies in every community across this country. I respectfully endorse the Commission's proposal to expand Part 74 LPAS rules to accommodate performing arts organizations and educational institutions that use fewer than 50 wireless microphones. The proposal is a much-needed solution that benefits the arts community and the public as well as the many new and emerging unlicensed white space technologies.

Sincerely,

A handwritten signature in dark ink, appearing to read 'Liz Lisle', with a long horizontal line extending to the right.
