PETITION FOR RULEMAKING

L. Topaz Enterprises, Inc., pursuant to ¶1.401 hereby submits this Petition for Rulemaking which proposes to allocate a new channel 292A to Desert Hills, Arizona.

The Commission has previously determined that Desert Hills, Arizona is a bona fide community with one licensed FM¹ already assigned to the community. Desert Hills is a census-designated place in Mojave County, AZ with a population of 11,265 (2010 census). Desert Hills is home to several retail establishments, a local fire station, churches, and a large public middle school. Desert Hills is deserving of a second fulltime aural service as the proposed channel will provide additional diversity and an outlet for local residents.

Channel 292A can be allotted to Desert Hills at reference coordinates 34-32-57.8N x 114-22-01.6W (NAD 27) consistent with ¶73.207 of the Commission Rules with respect to all existing and proposed allotments and facilities. A technical showing has been included confirming that the channel can be allotted to Desert Hills consistent with the Commission's separation requirements (see Figures 1,2 & 3).

¹KRRK(FM), Facility ID 38314, Desert Hills, AZ

Petitioner has concurrently filed FCC Form 301 for the requested channel. Should the Commission authorize channel 292A at Desert Hills, Arizona, Petitioner will participate in the auction process, and if successful in obtaining a construction permit, promptly construct and operate the proposed station.

L. Topaz Enterprises, Inc. requests that the following channel be allocated:

<u>Community</u>	<u>Channel</u>
Desert Hills, AZ	292A

The proposed channel 292A will provide a local service to the community of Desert Hills, AZ, there by advancing the Commission's goals of serving the public interest, convenience, and necessity.

I, Dale A. Ganske, do certify that the statements in this Petition are true, complete, and correct to the best of my knowledge and belief, and are made in good faith. I certify that all certifications and attached Exhibits are considered material representations.

Respectfully Submitted,

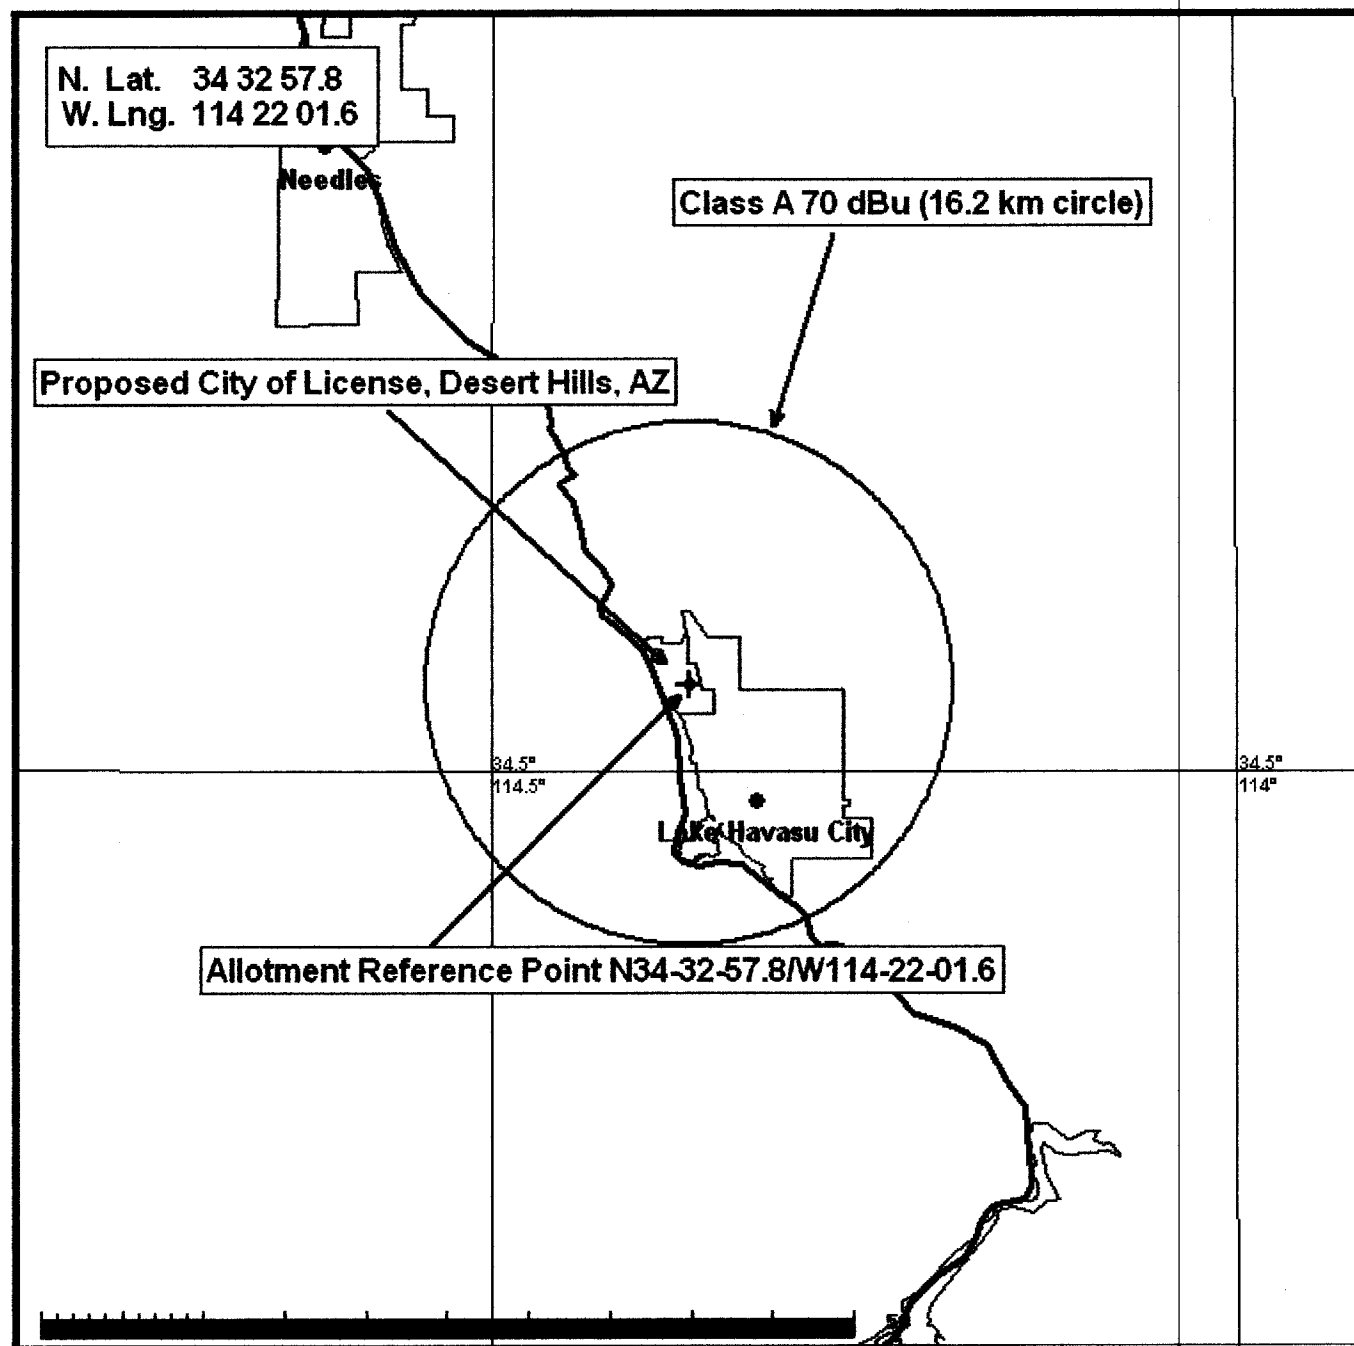

Dale A. Ganske, President

EXHIBIT 27 - COMPREHENSIVE TECHNICAL EXHIBIT

DISCUSSION

This technical exhibit was prepared in support of an application for a construction permit for a new FM station to operate on Channel 292A (106.3 Mhz) at Desert Hills, AZ. Specifically, operation is proposed on Channel 292A from an existing tower with a non-directional effective radiated power of 6.0 kilowatts (kW) and an antenna height above average terrain (HAAT) of -153 meters.

ENVIRONMENTAL PROTECTION

There will be no new construction. The proposed Type 3, three bay antenna will be mounted on an existing registered structure (monopole) with the center-of-radiation located 30 meters AGL. Using the FCC FMPower software program yields a maximum calculated power density at 2 meters above ground level of 53.6 microwatts/cm² located 14 meters from the base of the supporting structure. This

value is well below the Commission's recommended limit applicable to general population/uncontrolled exposure areas ($200 \mu\text{W}/\text{cm}^2$ for FM frequencies) (see Figure 7).

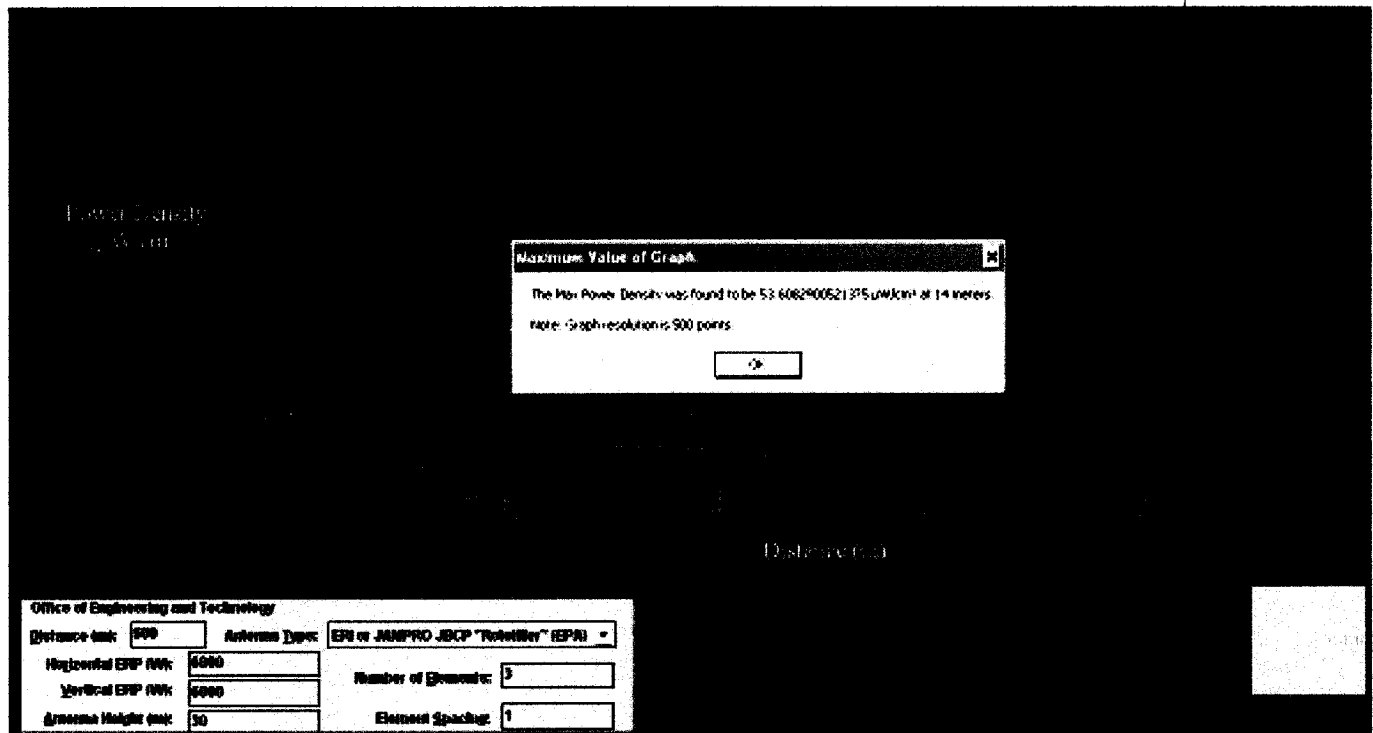

FIGURE 7

There are no other broadcast facilities within 318 meters of the proposed antenna.

Access to the tower site will be restricted and appropriately marked with warning signs. Procedures will be in effect to ensure that appropriate measures will be taken to assure worker safety with respect to radio frequency radiation exposure in the event that workers or other authorized personnel enter the restricted area or climb the tower. Such procedures include reducing the average exposure by spreading out the work over a longer period of time, wearing "accepted" RFR protective clothing and/or RFR exposure monitors, or, scheduling work when the station is at reduced power or shut down.
