

CERTIFICATION OF CPNI FILING March 1, 2018 EB Docket No. 06-36
Statement of CPNI Procedures and Compliance

IntelPeer Cloud Communications LLC ("IntelPeer" or the "Company") does not use or permit access to CPNI to market any services outside of the "total services approach" as specified in 47 CFR §64.2005. Nor does the Company allow affiliates or third parties access to CPNI for marketing-related purposes. If IntelPeer elects to use CPNI in a manner that does require customer approval, it will follow the applicable rules set forth in 47 CFR §64.2001 *et seq.*, including the institution of operational procedures to ensure that the appropriate notification is provided and customer approval is obtained before CPNI is used or disclosed. IntelPeer will develop and implement an appropriate tracking method to ensure that customers' CPNI approval status can be verified prior to using CPNI for marketing-related purposes. The Company will also adopt the requisite recordkeeping requirements should it use CPNI in the future for marketing-related purposes.

Consistent with the Commission's rules, IntelPeer uses, discloses, and permits access to CPNI without customer approval for the purposes of: (1) billing and collecting for services rendered; (2) protecting the rights and property of IntelPeer, other users, and other carriers from unlawful use; (3) providing inside wiring, installation, maintenance, and repair services; and (4) providing or marketing services to the customer that are within the same class of services to which the customer already subscribes.

IntelPeer does not currently market to customers that call and make inquiries concerning their account information. But should the Company choose to do so in the future, it will obtain a customer's oral authorization. IntelPeer will also require each of its representatives to provide the disclosures required by 64.2008(c) of the CPNI rules including informing customers of their right to deny access to the CPNI before requesting this one-time consent.

In order to authenticate a customer's identity prior to disclosing CPNI, IntelPeer authenticates the customer using a variety of methods. IntelPeer has implemented procedures to allow customers to change their account information in a manner that conforms with the relevant rules. IntelPeer has implemented procedures whereby it will not provide CPNI without proper customer authentication and does not provide call detail records over the phone. Call detail records are exclusively provided electronically on secure on-line sites or via electronic mail to the electronic address of record. IntelPeer has also implemented procedures to provide law enforcement with notice should a breach of CPNI occur. After notifying law enforcement and unless directed otherwise, IntelPeer will notify affected customers. IntelPeer will maintain a record of any CPNI-related breaches for a period of at least two years.

All IntelPeer employees who have access to CPNI receive annual training about CPNI compliance. Specifically, a summary of IntelPeer's CPNI policies are included in the Company Policies available on the intranet site. All IntelPeer employees are required to maintain the confidentiality of all confidential information, including customer information, that is obtained as a result of their employment by IntelPeer. Employees who do not abide by these policies or otherwise permit the unauthorized use or disclosure of CPNI will be subject to discipline, up to and including termination.
