

To Whom It May Concern,

Following our first year in the E-Rate program for universities and schools, we were able to provide fast internet to our students for use in our STEM program. As a charter school, finding resources for our students can often be a challenge, but the E-Rate program have been a big help. However, due to this being our first year, we were not aware that we needed to apply for a new 471 every year for our internet service. We believed that entering into a 5-year contract made that unnecessary. As a result, we are asking for a Deadline Waiver for our 2017 471 our Entity Number is 17006272.

Thank You,
