CC Docket 92-76  
Washington, D.C. 20554

MAY 14 1992

Subj: COMMENTS REGARDING THE ESTABLISHMENT OF AN ADVISORY  
COMMITTEE TO NEGOTIATE PROPOSED REGULATIONS FOR LEO

Ref: (a) FCC Docket No. 92-76 released April 16, 1992

1. The DoN has definite interest in the proceedings outlined in reference (a) defining technical and service rules for Low-Earth Orbit (LEO) satellites. A Federal Advisory Committee could be an effective method for ensuring harmonious sharing between LEO satellites and government terrestrial operations. Should such a committee develop, the DoN will be a participating member. Details relative to paragraph 11 of reference (a) concerning member application will be provided at the appropriate time.
