Re: Connect America Fund, WC Docket No. 10-90

Dear Ms. Dortch:

Alaska Communications Systems Holding, Inc. (ACS) hereby files a list of locations to which it deployed broadband services meeting the Commission's Connect America Fund ("CAF") Phase II requirements as of December 31, 2018. Each year carriers are required to file by March 1st, with a certification, their list of locations to which they deployed CAF-II supported services as of the previous December 31st.

ACS will complete its 30 percent filing on March 1st 2019, but it has come to our attention that a number of locations filed in its previously certified HUBB filings are not accurate. In some cases, this inaccuracy is due to updates in Alaska Borough parcel maps or updates to third party geo-coding software used by ACS. By this filing, ACS seeks to provide the Commission and USAC with a current, accurate list of its CAF Phase II Locations.

Pursuant to FCC 16-143 paragraph 52, "ACS is required to submit the requisite information to USAC no later than March 1 of each year for locations where they offered service in the prior year. In addition to the submission of the geo-coded locations, ACS must also certify the information submitted to USAC is accurate and any information submitted to USAC and certified in earlier filings continues to be accurate." ACS is concerned that for these required certifications to be truthful, complete and accurate in the upcoming March 1, 2019 filing, the location information on file with the Commission and USAC must be accurate.

Having had exposure to the many issues involved with utilizing software to accurately geo-code a location, and experience in resolving these issues, ACS is now able to more precisely identify the locations to which it has deployed CAF II-eligible services. However, ACS is unable to modify the location identification coordinates or remove locations in the HUBB- the system does not permit these updates. The HUBB system allows manual edits to address locations but not deleting or updating the geo-coding information. Due to the deficiencies of the HUBB system ACS is unable to provide accurate information and thus provides the attached list to meet its March 1st certification requirement and to ensure that the CAF II locations provided by ACS reflects all known corrections needed to the existing HUBB data. ACS believes the enclosed data clearly identifies the most accurate information currently available on CAF II-eligible locations serviced by ACS

ACS understands that the difficulties the company has experienced in updating and correcting HUBB entries has also impacted other carriers and has been brought to the attention of the Commission's Wireline Competition

Marlene H Dortch, FCC Secretary

Bureau. Certain information in the HUBB cannot be corrected or deleted except by manual manipulation by USAC personnel. Other corrections must be uploaded one location at a time. ACS hopes the Commission and USAC will promptly address these shortcomings. In the meantime, ACS respectfully requests that this list of locations to which ACS deployed broadband services meeting CAF II requirements as of December 31, 2018, be accepted and made part of the record.

A copy of this filing is also being provided to the Universal Service Administrative Company, affected Tribal Governments, where applicable, and the Regulatory Commission of Alaska.

Please contact me if you have any questions

Sincerely,

A handwritten signature in black ink, appearing to read "Ruth L. Willard". The signature is fluid and cursive, with the first name "Ruth" being more prominent.

Ruth L Willard, Senior Director Revenue Management
