I am asking for a waiver to have a 471 out of window accepted. There was a clerical error when certifying 470 application # 190015890 on 2/12/2019. The error was *Basic Maintenance of Internal Connections* was selected instead of *Internal Connections*. This error was not discovered until the applicant started the 471 process.

UCAS recommended: *For the current filing window, the applicant should comply with all program rules (such as the minimum 28-day waiting period after filing the Form 470), submit the Form 471 as soon as possible, and then file a waiver request with the FCC as soon as possible after filing the Form 471 in order to request to have the now Out-of-Window Form 471 to be considered timely filed.*

Any consideration in extending the filing window for the new 470 application#190029686 that was certified on 4/3/2019 would be greatly appreciated.
