Re: IB Docket No. 16-185, *DOCUMENT WAC/085 (11.03.19)*

Dear Ms. Dortch:

I am writing in support of including a future agenda item at the World Radio Conference (WRC) to harmonize frequency bands for ENG & PMSE operations, i.e. wireless microphones, as proposed in Document WAC/085 (11.03.19).

I am with Fox Music Inc and our company has been in business since 1928.

We serve the Education and Worship and Government markets with Audio and Video and Communications equipment.

Many of our system for training, worship, performance and even testimony require the use of wireless microphones.

In recent years, many of our clients have had to replace working professional wireless systems due to restrictions that have been put in place, AFTER THEY HAVE PURCHASED their equipment due to FCC Regulations.

First the 700-800 MHZ spectrum has become restricted due to the need for communication for EMS, Law Enforcement, and Homeland Security !

This has put many clients in the continental US in a position of having to re-invest their funds to replace their systems.

Currently, there are now issues coming into play in the 600-700mhz spectrum due to the fact that these frequencies have been sold to the Communications industry.....for profit !

There are also issues throughout the country in which on certain frequencies that are good in one Region and not in others, which makes the investment of wireless products quite difficult for traveling and touring performers and corporate events where wireless use is a must.

Please, consider standardizing the frequencies that are available and allotted for use and protect protect the users that have invested in the current products.

Respectfully submitted,

Victor Quarterman
