Description of Change:

Replacing copper (metallic) feeder facilities with fiber optic cable and Digital Loop Carrier (DLC) systems. The public notice of this network change will identify the services that will be transferred to the DLC. Changes may occur to existing circuits because they are not compatible with DLC. Any existing UNE xDSL or Digital Design Loop (DDL) services may be disconnected with this network change.

Description of Foreseeable Impact:

These network changes will create the potential for spectral interference on the CO-based ADSL and/or a Digital Design Loop (DDL) loops that share the same binder groups as the RT ADSL within the copper distribution feeder cable past the Feeder Distribution Interface (FDI).

After the planned network changes are implemented, there will be no copper (metallic) loop facilities between Consolidated's Exeter Central Office and the remote terminal in the affected area. Copper (metallic) sub-loop facilities will remain in place between Consolidated's Remote Terminal and customer premises in the affected area.
