There may be one or more obsolete, narrowband services (such as certain DS0 level services) that are incompatible with or unavailable over fiber. If so, we will work closely with those customers to address their particular needs.

All of Verizon's copper retirement notices may be viewed on Verizon's website at <http://www.verizon.com/about/terms-conditions/network-disclosures>

Description of the planned network change(s):

Verizon intends to retire the copper facilities at specified addresses in the 96 Pennsylvania wire centers listed above. Verizon has deployed or plans to deploy its fiber-to-the-premises network in these areas and intends to provide services over a fiber network infrastructure. Updating our

network from copper to fiber benefits our customers because of fiber's resiliency and reliability, especially in inclement weather. Fiber also provides our customers with expanded capabilities to grow with current bandwidth demands for their home or business.

Description of reasonably foreseeable impact(s) of the planned change(s):

After the retirement of the copper facilities, Verizon will: (1) no longer offer services over copper facilities; and (2) cease maintaining the copper facilities. To help ensure an orderly transition, Verizon may require customers and interconnecting entities to migrate services off of copper facilities well before the copper retirement implementation date.
