

I am a Tech licensed amateur radio operator KI7TEY. Any modification of Amateur radio rules should be completed in collaboration and endorsement of the ARRL. The commission should modify sections 97.305 and 97.307 of the commission's rules so as to delete all reference to symbol rate from section 97.307(f) of the Commissions rules to create any necessary conforming amendments top other sections of the rules; and to establish a bandwidth limit of 2.8 KHz for amateur data emissions below 29.7 Mhz within the RTTY/data standards.
