EXHIBIT A

1 March 2018

Today I regrettably must announce that Global Technology Associates, Inc. will stop selling hardware appliances, software firewalls, monthly maintenance and subscriptions as of 1 May 2018. All items will be available for sale until and through 1 May 2018, but coverage periods for subscriptions must terminate no later than 31 May 2018. Non-subscription add-on items, such as user license upgrades, Mobile VPN client licenses and Single Version Upgrades will be available for purchase through 31 May 2018.

Existing contracts and/or subscriptions with end dates beyond 31 May 2018 will continue to be serviced until they expire. We intend to keep our license servers, web site and support center up and running for as long as possible and necessary.

Global Technology Associates, Inc. was founded in 1992, as a small software company by software engineers who sought to produce quality products they cared about. When the Internet Boom hit in the late 90's, venture capitalists came calling who saw an opportunity to jump on the bandwagon and "make a lot of money." GTA resisted all such offers. Profit was not the main motive and I felt staying small and in control was the only way for us to keep producing quality products and offer the personalized services our customers appreciated and came to rely upon over the years. Market forces and industry consolidation however impacted our sales and ability to compete in the marketplace over the years.

I want to personally thank all of our customers past and present for their patronage over these past 26 years. Some of you have been with us for nearly as long as GTA has been in existence and we deeply appreciate your loyalty over the years. I wish circumstances were different and GTA could continue on; however, that is not possible.

Please direct any questions or concerns you might have to sales@gta.com and we will do our very best to address any issues.

Sincerely,

Paul J. Emerson
President
