REQUEST FOR WAIVER OF 471 APPLICATION

New Hampton Community School District, BEN 132188

471: (Category 2, Basic Maintenance of Internal Connections)

FRN 1999077251: Basic Maintenance of Internal Connections

New Hampton Community School District, a rural public school in northeast Iowa (60% E-rate discount), respectfully requests a waiver of the 2019-20 Form 471 application.

We are currently working with multiple vendors because we were lucky enough to get approval to build a new middle school addition. As a first time category 2 filer, I misinterpreted the rules necessary for the filing window to be met in time and I also did not make hard deadlines for our vendors to design the re-envisioned network. With our limited resources I believe we have done a good job of researching and making the best choices of products and services for the district.

The following application contains all of the important upgrade and maintenance information of our internal connections from Communications

Engineering Company (SPN: 143005154) for our children and educators and we simply need the discount to continue our work of educating our rural and high-risk students.

We are filing this waiver request today because we are unsure of when we will receive an actual OOW – Out Of Window Notification from USAC. We understand that all documents for 2019 are in the EPC portal, but we don't know when we will receive the OOW.

Thank you so very much for your support in granting this request for waiver of the filing deadline of March 27, 2019.

Respectfully submitted this April 16, 2019.

Jeremiah Cantu, Technology Director
