**Re: Notice of Ex Parte Presentation in GN Docket No. 17-258**

Dear Ms. Dortch:

On April 11<sup>th</sup> and April 12<sup>th</sup>, representatives from Motorola Solutions (MSI) met with Rachael Bender, Wireless Advisor to Chairman Pai and Michael Scurato, Media Legal Advisor to Commissioner Clyburn in separate meetings to discuss issues under consideration for the 3550-3700 MHz Citizens Broadband Radio Service (CBRS) in the above-referenced proceeding. Attending these meetings on behalf of MSI were Gene Fullano, Senior Director of Government Affairs, David Gurney, Distinguished Member of the Technical Staff, its consultant, Michael Lewis, and the undersigned.

Motorola Solutions discussed its plans for manufacturing and marketing CBRS equipment and services for critical infrastructure industries, manufacturing, enterprises, schools and higher education, and other private business broadband applications delivered over campus settings. We stated that the CBRS market for these entities is aided by the availability of priority access licenses (PALs) covering smaller-sized service areas to maximize deployment opportunities for users of high quality of service (“QoS”) private networks in interference protected spectrum. MSI therefore urged the Commission to ensure that any newly adopted CBRS rules or provisions continue to provide opportunities for parties to bid on PALs covering service areas that are smaller than Partial Economic Areas. Ideally, this would include a mix of county-sized license areas and census tract sized licenses in all geographic areas.

The positions presented by MSI in these two meetings are reflected in MSI’s previously submitted comments in this proceeding. *See* Comments of Motorola Solutions, Inc., GN Docket No. 17-258, submitted December 28, 2017. If there are any questions regarding this matter, please contact me. . We recommended a mix of county-sized license areas and census tract sized licenses in all geographic areas.

Respectfully Submitted,

/s/ Frank Korinek
