Public Notice: can be obtained on the Internet at:

<https://ebiznet.att.com/networkreg/>

Implementation Date: On or after August 28, 2019

Description of Network Changes Planned:

AT&T California intends to retire copper feeder facilities to specific distribution areas (DA) due to ongoing cable failures, primarily due to moisture, that compromise services provided in a portion of the Santa Rosa wire center, SNRSCA01, 516 3rd Street, Santa Rosa, CA. Rather than replace the copper cable, existing services will be migrated to a fiber-fed digital loop carrier (DLC) solution and future services provisioned on that DLC. The affected DAs include 320601, 320301, and 320701.

Description of Reasonably Foreseeable Impact of the Planned Changes:

After implementation of this plan, copper facilities originating from the central office and serving the affected DAs will no longer be available. Unbundled loops that are defined as compatible with DLC, e.g., those defined to transport POTS-grade service, will be transferred without consequence. However, it should be noted that if a competitive carrier's existing unbundled loop has been defined to transport POTS-grade service, but then utilized to provide DSL service, the competitive carrier must seek an alternative solution under the planned change.

There are presently 304 total working services affected under this notice with a subset of 39 known competitive carrier circuits impacted.
