The amount of devices accessing The Banks School District network on a daily basis has steadily increased over the last several years. The cache appliance referenced in this contract has the ability to support our expanding network infrastructure in the following ways 1. Provide software update caching from leading operating systems and reputable vendors such as Apple, Adobe, Windows, and Google. The caching appliance will need to have byte range request capability and multiple ways to schedule and deploy any given update. 2. Conduct video caching and cache http as well as https content. 3. Include a support agreement to ensure that the appliance continues to functions as expected in light of ongoing web caching rule changes. 4. Provide teachers with the capability to pre-cache content.
