(Rochester, Indiana))

RM No. 9036

RECEIVED

JAN - 8 1991

To: Chief, Policy and Rules Division

Federal Communications Commission
Office of the Secretary

PETITION FOR RULEMAKING

Dowagiac Broadcasting Company, Inc., licensee of Station WDW(FM), Dowagiac, Michigan, hereby requests institution of a rulemaking proceeding to amend Section 73.202(b) of the Commission's Rules to substitute Channel 229A for Channel 221A at Rochester, Indiana, and concurrently modify the license of Station WROI(FM) Rochester, Indiana to specify operation on Channel 229A in lieu of Channel 221A. Thus, the proposed re-allocation is:

CHANNEL NO.

<u>City</u>	<u>Present</u>	<u>Proposed</u>
Rochester, Indiana	221A	229A

1. Substituting Channel 229A for 221A at Rochester, IN will serve the public interest.

2. Attached hereto as Appendix A is an Engineering Statement of F.W. Hannel, prepared on behalf of Dowagiac Broadcasting Company, Inc., establishing, inter alia, the following:1/

1/ Appendix A, addresses an alternate proposal for assigning Channel 293A to Rochester IN. However, Petitioner hereby withdraws that alternate request in view of the Commission's upgrade of Station WNZE(FM) Plymouth, IN. discussed at paragraph 3, infra.

(a) At present, Station WROI(FM) Rochester, IN., operating on Channel 221A, is short-spaced 5.2 miles to the presently licensed facilities of WDOW-FM, and is short-spaced 4 miles to the presently licensed facilities of WVSH(FM) Huntington IN. Both short-spacings are "grandfathered".

(b) If Station WROI(FM) is modified to operate on Channel 229A, the "grandfathered" short-spacing with Stations WDOW-FM and WVSH(FM) would be removed, and, on Channel 229A, WROI(FM) would not be short-spaced with any licensed facility (except a slight short spacing with the present licensed facilities of Station WNZE(FM), Plymouth, IN).

(c) There is a Rule Making proceeding, involving Station WNZE(FM), to upgrade WNZE(FM) from Channel 232A to 232B1 (at a new site), and, if approved, the 232B1 facility would not be short-spaced with Station WROI(FM) on proposed Channel 229A.

3. The attached Engineering Statement (Appendix A) was prepared November 1, 1990. On November 23, 1990, the Commission, by Report and Order, DA 90-1619, in RM-7228, did modify the license of Station WNZE(FM) to operate on Channel 232B1. That Report and Order became effective yesterday, January 7, 1991. Thus, WROI(FM) on proposed Channel 229A will not be short-spaced with any facility, including WNZE(FM) on Channel 232B1.

4. Adoption of this proposal will serve the public interest. It will remove WROI(FM)'s grandfathered short spacing with Stations WDOW-FM and WVSH(FM). This, in turn will

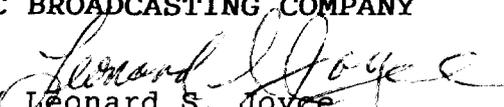

permit WDOF-FM, to improve its facilities. As stated, at Appendix A, attached hereto, there is no area in which WDOF-FM can be located as a fully spaced Class A facility with WROI(FM) on Channel 221A. However, with WROI(FM) on Channel 229A, WDOF-FM will become a fully-spaced Station, permitting it to increase power to 6 kw (on 221A+). Thus, the proposal will provide for a more efficient distribution of channels, without any adverse effects.

5. Pursuant to Commission precedent, the licensee of Station WDOF-FM will reimburse Station WROI(FM) for its reasonable and prudent expenses for changing its frequency from Channel 221A to Channel 229A, at its existing site. If this proposal is granted WDOF-FM, it promptly will apply for increase in power from 3kw to 6kw, and when granted, promptly construct and commence operation at 6kw.

Wherefore, the premises considered, it is respectfully requested that a Rulemaking proceeding be initiated to substitute Channel 229A for Channel 221A at Rochester, Indiana, and modify the license of Station WROI(FM) for operation on Channel 229A.

Respectfully Submitted,

DOWAGIAC BROADCASTING COMPANY

Dowagiac, Michigan
November 1990

ENGINEERING STATEMENT

This firm has been retained by Dowagiac Broadcasting Co. Inc., licensee of Radio Station WDOV(FM), Dowagiac, Michigan, to prepare this engineering statement in support of its Petition to Amend the FM Table of Allotments to assign FM Channel 221A⁺ to the community of Dowagiac, Michigan. The present facilities of Radio Station WDOV(FM) are short-spaced to the presently assigned FM Channel 221A at Rochester, Indiana, and to the presently assigned FM Channel 222A at Allegan, Michigan. Dowagiac Broadcasting Co. Inc., is seeking to relocate its transmitter site so that it may operate as a fully spaced Class A allotment on FM Channel 221A⁺. The desired site is approximately 5 miles south of its present site, and the relocation requires that the presently assigned FM Channel 221A at Rochester, Indiana, be changed to another channel, thereby providing Radio Station WDOV(FM) with the required mileage separations for full a fully spaced Class A assignment. This fully spaced assignment of FM Channel 221A⁺ at Dowagiac, Michigan, requires that the facilities of Radio Station WROI(FM) Rochester, Indiana, be relocated to either FM Channel 229A or FM Channel 293A. At the present time there is no area in which Radio Station WDOV(FM) can be located as a fully spaced Class A facility.

Attached as Exhibit E-1 is an FM Channel Study conducted from reference site located at N41-55-32, W86-03-14. This site is 5 miles southeast

of Dowagiac, Michigan, (U.S. Atlas co-ordinates N41-59-06, W86-06-30), and a wide area exists around this sample site that would provide adequate area for Dowagiac Broadcasting Co. Inc., to locate a fully spaced Class A transmitter site. The only short-spacing that exists at this site is the presently licensed facilities of Radio Station WROI(FM), Rochester, Indiana.

Examination of the facilities of Radio Station WROI(FM) Rochester, Indiana, reveals that it is presently a grandfathered short-spaced Class allotment on FM Channel 221A⁻, as is more fully demonstrated in Exhibit E-2. Exhibit E-2 is a channel study for Radio Station WROI(FM) Rochester, Indiana, conducted on FM Channel 221A, and an inspection of this channel study reveals that WROI(FM) is short-spaced 4 miles to the facilities of Radio Station WVSH(FM), Huntington, Indiana, and is also short-spaced 5.2 miles to the present facilities of Radio Station WDOW(FM), Dowagiac, Michigan. Attached as Exhibit E-3 is an FM Channel study for FM Channel 229A⁻ for WROI(FM), conducted from the presently licensed transmitter site for that facility. Examination of the channel study reveals that the proposed assignment of FM Channel 229A can be made in full compliance with the Rules with only one slight short-spacing to the presently licensed facilities of Radio Station WNZE(FM), Plymouth, Indiana. That facility has a Petition For Rulemaking pending in which it is seeking the allotment of FM Channel 232B1, and, should this upgrade be allotted, the assignment of FM Channel 229A⁺ can be made in full compliance with the mileage separation requirements of the Rules.

A second alternate channel can be substituted for FM Channel 221A⁻ at the present transmitter site of Radio Station WROI(FM), Rochester, Indiana. Attached as Exhibit E-4 is an FM Channel Study conducted on FM Channel 293A⁻ at the present transmitter site of Radio Station WROI(FM). This channel study shows that FM Channel 293A⁻ can be assigned to Rochester, Indiana, at

the present site of Radio Station WROI(FM) as a grandfathered Class A allotment.

The adoption of the proposed changes in the FM Table of Allotments results in the allotment of at least one fully spaced Class A allotment at Dowagiac, Michigan, with no penalties to any community. If the Commission were to assign FM Channel 229A to Rochester, Indiana, at the present transmitter site of Radio Station WROI(FM), this channel would only be short-spaced by 0.6 miles, substantially less than the present short spacing. Further, if the Commission were to assign FM Channel 232B1 to Plymouth, Indiana, as is being requested by Radio Station WNZE(FM), the resulting allotment of FM Channel 229A would be a fully spaced Class A allotment. As a secondary choice, should the Commission decline to assign FM Channel 229A to Rochester, Indiana, it is requested that FM Channel 293A be assigned to that community as an alternate equivalent channel that will serve as a grandfathered 3 kw Class A alternate channel at the present transmitter site of Radio Station WROI(FM).

RM No. 9036

Federal Communications Commission
Office of the Secretary

To: Chief, Policy and Rules Division

PETITION FOR RULEMAKING

Dowagiac Broadcasting Company, Inc., licensee of Station WDW(FM), Dowagiac, Michigan, hereby requests institution of a rulemaking proceeding to amend Section 73.202(b) of the Commission's Rules to substitute Channel 229A for Channel 221A at Rochester, Indiana, and concurrently modify the license of Station WROI(FM) Rochester, Indiana to specify operation on Channel 229A in lieu of Channel 221A. Thus, the proposed re-allocation is:

CHANNEL NO.

<u>City</u>	<u>Present</u>	<u>Proposed</u>
Rochester, Indiana	221A	229A

1. Substituting Channel 229A for 221A at Rochester, IN will serve the public interest.
2. Attached hereto as Appendix A is an Engineering Statement of F.W. Hannel, prepared on behalf of Dowagiac Broadcasting Company, Inc., establishing, inter alia, the following:1/

1/ Appendix A, addresses an alternate proposal for assigning Channel 293A to Rochester IN. However, Petitioner hereby withdraws that alternate request in view of the Commission's upgrade of Station WNZE(FM) Plymouth, IN. discussed at paragraph 3, infra.

(a) At present, Station WROI(FM) Rochester, IN., operating on Channel 221A, is short-spaced 5.2 miles to the presently licensed facilities of WDOW-FM, and is short-spaced 4 miles to the presently licensed facilities of WVSH(FM) Huntington IN. Both short-spacings are "grandfathered".

(b) If Station WROI(FM) is modified to operate on Channel 229A, the "grandfathered" short-spacing with Stations WDOW-FM and WVSH(FM) would be removed, and, on Channel 229A, WROI(FM) would not be short-spaced with any licensed facility (except a slight short spacing with the present licensed facilities of Station WNZE(FM), Plymouth, IN).

(c) There is a Rule Making proceeding, involving Station WNZE(FM), to upgrade WNZE(FM) from Channel 232A to 232B1 (at a new site), and, if approved, the 232B1 facility would not be short-spaced with Station WROI(FM) on proposed Channel 229A.

3. The attached Engineering Statement (Appendix A) was prepared November 1, 1990. On November 23, 1990, the Commission, by Report and Order, DA 90-1619, in RM-7228, did modify the license of Station WNZE(FM) to operate on Channel 232B1. That Report and Order became effective yesterday, January 7, 1991. Thus, WROI(FM) on proposed Channel 229A will not be short-spaced with any facility, including WNZE(FM) on Channel 232B1.

4. Adoption of this proposal will serve the public interest. It will remove WROI(FM)'s grandfathered short spacing with Stations WDOW-FM and WVSH(FM). This, in turn will

permit WDOF-FM, to improve its facilities. As stated, at Appendix A, attached hereto, there is no area in which WDOF-FM can be located as a fully spaced Class A facility with WROI(FM) on Channel 221A. However, with WROI(FM) on Channel 229A, WDOF-FM will become a fully-spaced Station, permitting it to increase power to 6 kw (on 221A+). Thus, the proposal will provide for a more efficient distribution of channels, without any adverse effects.

5. Pursuant to Commission precedent, the licensee of Station WDOF-FM will reimburse Station WROI(FM) for its reasonable and prudent expenses for changing its frequency from Channel 221A to Channel 229A, at its existing site. If this proposal is granted WDOF-FM, it promptly will apply for increase in power from 3kw to 6kw, and when granted, promptly construct and commence operation at 6kw.

Wherefore, the premises considered, it is respectfully requested that a Rulemaking proceeding be initiated to substitute Channel 229A for Channel 221A at Rochester, Indiana, and modify the license of Station WROI(FM) for operation on Channel 229A.

Respectfully Submitted,

DOWAGIAC BROADCASTING COMPANY

ENGINEERING STATEMENT

This firm has been retained by Dowagiac Broadcasting Co. Inc., licensee of Radio Station WDOV(FM), Dowagiac, Michigan, to prepare this engineering statement in support of its Petition to Amend the FM Table of Allotments to assign FM Channel 221A⁺ to the community of Dowagiac, Michigan. The present facilities of Radio Station WDOV(FM) are short-spaced to the presently assigned FM Channel 221A at Rochester, Indiana, and to the presently assigned FM Channel 222A at Allegan, Michigan. Dowagiac Broadcasting Co. Inc., is seeking to relocate its transmitter site so that it may operate as a fully spaced Class A allotment on FM Channel 221A⁺. The desired site is approximately 5 miles south of its present site, and the relocation requires that the presently assigned FM Channel 221A at Rochester, Indiana, be changed to another channel, thereby providing Radio Station WDOV(FM) with the required mileage separations for full a fully spaced Class A assignment. This fully spaced assignment of FM Channel 221A⁺ at Dowagiac, Michigan, requires that the facilities of Radio Station WROI(FM) Rochester, Indiana, be relocated to either FM Channel 229A or FM Channel 293A. At the present time there is no area in which Radio Station WDOV(FM) can be located as a fully spaced Class A facility.

Attached as Exhibit E-1 is an FM Channel Study conducted from reference site located at N41-55-32, W86-03-14. This site is 5 miles southeast

of Dowagiac, Michigan, [U.S. Atlas co-ordinates N41-59-06, W86-06-30], and a wide area exists around this sample site that would provide adequate area for Dowagiac Broadcasting Co. Inc., to locate a fully spaced Class A transmitter site. The only short-spacing that exists at this site is the presently licensed facilities of Radio Station WROI(FM), Rochester, Indiana.

Examination of the facilities of Radio Station WROI(FM) Rochester, Indiana, reveals that it is presently a grandfathered short-spaced Class allotment on FM Channel 221A⁻, as is more fully demonstrated in Exhibit E-2. Exhibit E-2 is a channel study for Radio Station WROI(FM) Rochester, Indiana, conducted on FM Channel 221A, and an inspection of this channel study reveals that WROI(FM) is short-spaced 4 miles to the facilities of Radio Station WVSH(FM), Huntington, Indiana, and is also short-spaced 5.2 miles to the present facilities of Radio Station WDOW(FM), Dowagiac, Michigan. Attached as Exhibit E-3 is an FM Channel study for FM Channel 229A⁻ for WROI(FM), conducted from the presently licensed transmitter site for that facility. Examination of the channel study reveals that the proposed assignment of FM Channel 229A can be made in full compliance with the Rules with only one slight short-spacing to the presently licensed facilities of Radio Station WNZE(FM), Plymouth, Indiana. That facility has a Petition For Rulemaking pending in which it is seeking the allotment of FM Channel 232B1, and, should this upgrade be allotted, the assignment of FM Channel 229A⁺ can be made in full compliance with the mileage separation requirements of the Rules.

A second alternate channel can be substituted for FM Channel 221A⁻ at the present transmitter site of Radio Station WROI(FM), Rochester, Indiana. Attached as Exhibit E-4 is an FM Channel Study conducted on FM Channel 293A⁻ at the present transmitter site of Radio Station WROI(FM). This channel study shows that FM Channel 293A⁻ can be assigned to Rochester, Indiana, at

the present site of Radio Station WROI(FM) as a grandfathered Class A allotment.

The adoption of the proposed changes in the FM Table of Allotments results in the allotment of at least one fully spaced Class A allotment at Dowagiac, Michigan, with no penalties to any community. If the Commission were to assign FM Channel 229A to Rochester, Indiana, at the present transmitter site of Radio Station WROI(FM), this channel would only be short-spaced by 0.6 miles, substantially less than the present short spacing. Further, if the Commission were to assign FM Channel 232B1 to Plymouth, Indiana, as is being requested by Radio Station WNZE(FM), the resulting allotment of FM Channel 229A would be a fully spaced Class A allotment. As a secondary choice, should the Commission decline to assign FM Channel 229A to Rochester, Indiana, it is requested that FM Channel 293A be assigned to that community as an alternate equivalent channel that will serve as a grandfathered 3 kw Class A alternate channel at the present transmitter site of Radio Station WROI(FM).
