Before the  
FEDERAL COMMUNICATIONS COMMISSION  
Washington, D.C. 20554

Federal Communications Commission  
Office of the Secretary

In the Matter of )  
 )  
Amendment of Part 90 of ) RM-  
the Commission's Rules )  
to Permit Increased )  
Power On Certain 150 MHz )  
Paging Frequencies )

ERRATUM

The National Association of Business and Educational Radio, Inc. ("NABER"), through its attorneys, hereby files an Erratum to the Petition for Rule Making filed by NABER on June 27, 1988. The NABER Petition requested that the Commission amend Section 90.75(c)(15) and (16) of its Rules to permit paging licensees on 158.460 MHz and 157.740 MHz the ability to use up to 350 watts output power on their systems.

On page 2 of the Petition, NABER refers to the use of 154.625 MHz and 158.460 MHz as paging frequencies in the Business Radio Service. However, such use is referred to as being limited to "fifty (50) miles or more from airports listed in Section 90.75(c)(25)(viii)." This reference should be deleted. The restriction to areas fifty (50) miles or more from certain airports relates only to frequencies listed in Section 90.75(b) which contain restrictions 90.75(c)(15) and 90.75(c)(25). Specifically, the frequencies covered by both restrictions are 460.650 MHz through 460.875 MHz.

No. of Copies 015

to productivity and energy conservation in American business. Through its four (4) membership sections, NABER's effort to support the entire land mobile industry - from the individual two-way radio user to the largest radio equipment manufacturers and communications users. NABER is also the Federal Communications Commission's certified Frequency Coordinating Committee for the Business Radio Service.

In this proceeding, NABER requests that the Commission amend Section 90.75(c) (15) and (16) of the Commission's Rules to permit paging licensees on 158.460 MHz and 157.740 MHz the ability to use up to 350 watts output power on their systems.

#### BACKGROUND

There are presently four (4) paging-only frequencies in the 150 MHz band. 152.480 MHz is allocated pursuant to Section 90.75(c) (10) for paging-only use in the Business Radio Service with a maximum output of 350 watts. <sup>1/</sup> The frequency is also available on a secondary basis for Special Industrial and Forestry Products Radio Services two-way land mobile use. <sup>2/</sup> The frequencies 154.625 MHz and 158.460 MHz are also allocated for paging-only use by Business Radio licensees. Pursuant to Section 90.75(c) (15),

---

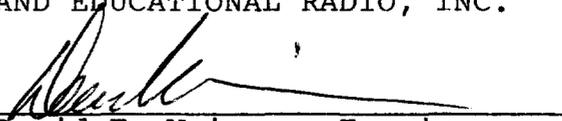

<sup>1/</sup>47 C.F.R. 90.25(b).

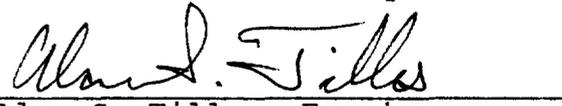

<sup>2/</sup>47 C.F.R. 90.75(c) (11).

WHEREFORE, the National Association of Business and Educational Radio, Inc. respectfully requests that the Commission accept the attached page 2 as a substitute for the page included in NABER's original Petition for Rule Making.

Respectfully submitted,

NATIONAL ASSOCIATION OF BUSINESS  
AND EDUCATIONAL RADIO, INC.
