Re: Letter Filing  
3.5 GHz SAS and ESC Applications, GN Docket No. 15-319.

Dear Ms. Dortch,

As you know, members of the Wireless Innovation Forum Spectrum Sharing Committee (hereafter “the WInnForum SSC”) have been developing a SAS software test harness in support of the baseline standards that were recently announced<sup>1</sup>. I am pleased to report that this test harness has been formally released as version 1.0.0 and is available on the web:

<https://github.com/Wireless-Innovation-Forum/Spectrum-Access-System/releases>  
<https://github.com/Wireless-Innovation-Forum/SAS-Data/releases>

This software is provided by Wireless Innovation Forum to aid in testing SASes for conformance to FCC Part 96 and WInnForum requirements, as specified in WINNF-TS-0061 (Test and Certification for Citizens Broadband Radio Service (CBRS); Conformance and Performance Test Technical Specification; SAS as Unit Under Test (UUT)). This software supports testing of a SAS against Version 1.2 of the SAS-to-CBSD protocol specification (WINNF-TS-0016) and Version 1.3 of the SAS-to-SAS protocol specification (WINNF-TS-0096)<sup>2</sup>.

The members of the WInnForum SSC will continue to maintain this Release of the test harness, with any issues found tracked using the GitHub issue tracker:

<https://github.com/Wireless-Innovation-Forum/Spectrum-Access-System/issues>

Pursuant to the Commission’s rules, this letter is being filed in the above-referenced docket for inclusion in the public record. Please contact me should you have any questions.

Respectfully submitted,

By /s/:  
Lee Pucker
