Re: Notice of Ex Parte Communications, WT Docket No. 20-133, WT Docket No. 10-153, RM-11824 (Aviation), RM-11825 (Maritime), WT Docket No. 15-244 (Terminated)

Dear Ms. Dortch:

This is to inform you that on June 1, 2020, David Goldman, Director of Satellite Policy for Space Exploration Technologies Corp. (“SpaceX”), spoke by telephone with Aaron Goldberger from the Office of Chairman Pai with respect to the above referenced proceeding.

To ensure that the record in this proceeding adequately addresses potential satellite operations in these bands, SpaceX suggested the Commission add the following questions to the Notice of Proposed Rulemaking:

- In paragraph 17, add: “We also seek comment on how changes to the antenna standards would impact the system for coordination between Federal and non-Federal users, and the opportunities for use of this spectrum for Fixed-Satellite Service operations?”
- At the end of paragraph 28, add: “Would aeronautical or maritime deployments in these bands inhibit use of this spectrum by Fixed-Satellite Service systems?”

Very best regards,

/s/ David Goldman

David Goldman
Director of Satellite Policy
