

Regarding MB 18-184

My name is Bill Countryman, and I am one of the Owners of KZRC 96.1 FM in Bennington, OK, USA.

I fully support the FM Class C4/73.215 petition filed by SSR Communications, Inc. and urge the Commission to adopt the complete proposal.

My stations fully support our community through various community events, Durant Magnolia Festival, LIVE coverage of area high school sporting events ranging from basketball, football, baseball to coverage of Southeastern Oklahoma State University's total sports college sports. Each month we recognize outstanding area high school athletes with regards to academics and athletics.

We are challenged with reaching listeners to the West due to our limit of only 6,000 watts. Owning stations and living right here in Southern Oklahoma it is very important for us to be as local as possible in order to survive in the digital age. An increase of power to 24,000 watts would allow us to reach more listeners in Southern Oklahoma without infringing on any other radio station.

I ask that you consider full implementation of the MB 18-184 proceeding without delay.

Sincerely,

Bill Countryman
