

Dear FCC,

Please keep net neutrality its a level playing field. By doing this you help provide small hosting companies fair access to the internet though paying for only the peering they use, not some peering of a peer down the network 4 ISPs away. This is not how the internet works. The bandwidth a Hosting company has is setup per its peers, its not responsible for the bandwidth bottle neck 2 peers away, because of net neutrality.

Thanks,  
Jason Archip
