Description of the Planned Network Changes:

Verizon will make changes to its Signaling System 7 (“SS7”) network and services resulting from Alcatel-Lucent’s discontinuance of equipment. The Alcatel-Lucent Signal Transfer Point (STP) located at 256 State Street, Hackensack, NJ will be removed from service and the SS7 traffic will be moved to the Oracle EAGLE STP located at 18 Paterson Street, New Brunswick, NJ. Also, the Alcatel-Lucent STP at 37 Maple Avenue, Morristown, NJ will be removed from service and the SS7 traffic will be moved to the Oracle EAGLE STP located at 95 William Street, Newark, NJ.

Description of Reasonably Foreseeable Impact of the Planned Changes:

SS7 Service providers with SS7 link terminations in Verizon's Hackensack and Morristown, NJ offices will be contacted prior to the rehome to confirm use of existing link terminations in the New Brunswick and Newark, NJ offices. Carriers will not have to submit Access Service Requests (ASRs) as the rehome will be completed using existing facilities to these offices.

SS7 service providers and any other affected carriers will need to alter their SS7 transport, OffNet services arrangements (services obtained from third parties) and/or Gateway services in order to access or continue serving customers served by offices that are currently homed to the Hackensack and Morristown, NJ STPs.
