**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to  
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

I am a small business owner who supports broadband competition.

We need more competition in the field of broadband services. This will enable prices to be affordable. I say NO to the price hikes that will increase the cost of internet and telephone services.

Broadband is critical to my home and business. I have competitive DSL! I have competitive phone service and this is very important to keep these prices affordable for small business owners like myself.

Local Broadband providers are critical to rural communities. Also, the fiber 5G is harmful to humans and all living things with the frequencies that they emit that keep us from the earth's energies. We don't need faster speeds. We need health and longevity. We need to be able to stay alive!

In many communities, local providers are the only connections rural communities have to the internet. Don't cut off rural America in an attempt to get everyone into these "smart" cities in order to dominate and control them. This will lead to a civilian war in America.

Pay attention! Stop this insanity.

Sincerely,

Lorraine Chilson
