**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

To the FCC -

As usual monopolistic America wants to once again destroy the ability for independent business to give the American people the benefits promised when they chose a competitive business environment for our country. I use an independent company (Sonic.net) for Internet and landline phone service. They are far superior in virtually every way by comparison with the likes of ATT, Comcast, et al. From pricing to tech support they make Megacorp look like the carpet baggers they are. But the biggies are again pursuing their attempts at expanding their monopoies.

Its time for regulators like the FCC to eliminate anti-competitive policies in the telecommunications industry. Not add more. Time to stimulate the growth of companies that Sonic that have demonstrated that they can provide innovative services that equal and often exceed that provided by the current dominant Corporations which want independents barred from access to public infrastructure... companies that want the last mile to be their exclusive property... that want you to believe only they can provide the facilities needed for modern communications.

PLEASE do not accede to the newest attempts to further monopolize phone and Internet service for the exclusive benefit of _____ (fill in the names. You know who they are). Fiber, copper and satellite infrastructure should be available for public use. Not reserved for the oligarchs.

Sincerely,

William Zane
