**Re: In the Matter of USTelecom for Forbearance Pursuant to  
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

Our family uses a local competitive ISP and have for almost 20 years. In the past we had used large corporate ISPs and always been disappointed in the poor service and high price of service. In the past if there was any issues with our service our phone calls and emails were ignored or when responded to we were told it wasn't their problem, when it turned out it was. This has never happened from our local ISP, Sonic.net. Sonic not only provides our internet service they provide our telephone service, and during the last 2 decades we have never had a single issue with that service. In the past, service provided by large corporate telephone providers had been plagued with poor and interrupted service. We have no desire to be restricted and over charged by bloated, corporate broadband providers, we strongly desire to keep our local, competitive, small business ISP.

Thank you.

Tim Miller
