**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

Sonic internet service has been the best copper /fiber provider for me the last five years. Previously, I was just limited to AT&T and Comcast for ISPs. These two company would not listen to their customers and constantly raise their prices. Furthermore, they could not keep up with the bandwidth demands. Every night at 11pm, my internet would died and could not reset until the next morning. Every time I complained, they would try to get me to sign on for more what they call better services at a higher rate. However, they could not guarantee that bandwidth would not died at that 11pm . Now, with Sonic, my internet has been stable and the speeds are around 1GBS every day with no drop. Sonic should be allowed to continue to service the residents of San Francisco because it is doing a good thing.
