**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

We need the internet to be free, democratic and allow small business versus monopolies. It was created by the government and universities so it belongs to the people.

And to enable access for all, Regardless of their economic status. Putting in situations where it keeps increasing in cost is making a cost prohibited regardless of their economic status. Putting in situations where it keeps increasing in cost is making a cost prohibitive. Already I am paying so much for data on my phone and on my mobile and Internet at home so this seems ridiculous to keep increasing the cost. already I am paying so much for data on my mobile and Internet at home so this seems ridiculous to keep increasing the cost or to prohibit growth of small business through policy

Thanks.
