**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

First I would like to address the issue of limitations for rental properties on using dish network which is affordable. Also, we are already exposed to greater amounts of EMF pollution caused by emitting wifi rather than Fiber which is proven to be safer for health and environment and yes it would be putting the control back in the hands of the consumer who is already nickle and dimed with extra fees and costs associated with outsourcing.

My only option would be Comcast and that has proven to be unreliable and deceptive marketing strategies. I have had to call them every month because of mistakes and spend wasted hours bringing the price down to the original agreement.

I live on Disability and need reliable providers. The private companies such as Sonic Provide honest reliable and friendly service.

Please do not do this. Big hardship for a lot of people that are struggling to make ends meet, not to mention the only entertainment available for elderly and disabled.

Thank you

Judith Hill
