**Re: In the Matter of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

I'm a citizen in San Francisco and very thankful that there is competition here among ISPs. I've been a fan for years of Sonic, an ISP with strong privacy protections and a local presence. I purchased their DSL service for years, getting better prices than Comcast/ATT could offer, while also supporting their company and business model.

I left the city for 3 years for a job transfer, have just returned recently, and I'm very happy that they now offer Fiber service for nearly the same price as my old DSL, but Fiber service is an amazing upgrade. It opens up many possibilities for me personally and professionally, granting me more flexibility to work from home. It was quick and painless to install and their support is great. I wish more people would be able to have this level of service, since it helps the whole community to have these internet capabilities. Please support their business and competition in this country.

Thanks

Matt Behrens
