4005 Rural Broadband Experiment

Authorized Rural Broadband Experiment (RBE) recipients must address the certification for public interest obligations, provide a list of newly served community anchor institutions, and provide a list of locations where broadband has been deployed.

Public Interest Obligations – FCC 14-98 (paragraphs 26-29, 78)

Please address Line 4001 regarding compliance with the Commission’s public interest obligations. All RBE participants must provide a response to Line 4001.

**4001.** Recipient certifies that it is offering broadband to the identified locations meeting the requisite public interest obligations consistent with the category for which they were selected, including broadband speed, latency, usage capacity, and rates that are reasonably comparable to rates for comparable offerings in urban areas?

Community Anchor Institutions – FCC 14-98 (paragraph 79)

**4003a.** RBE participants must provide the number, names, and addresses of community anchor institutions to which they newly deployed broadband service in the preceding calendar year. On this line, please respond (yes – attach new community anchors, no – no new anchors) to indicate whether this list will be provided.

If yes to 4003A, please provide a response for 4003B.

<b>4003b.</b> Provide the number, names and addresses of community anchor institutions to which the recipient newly began providing access to broadband service in the preceding calendar year.	Name of Attached Document Listing Required Information	
---	--	--

Broadband Deployment Locations – FCC 14-98 (paragraph 80)

<b>4004a.</b> Attach a list of geocoded locations to which broadband has been deployed as of the June 1st immediately preceding the July 1st filing deadline for the FCC Form 481.	Name of Attached Document Listing Required Information	
--	--	--

<b>4004b.</b> Attach evidence demonstrating that the recipient is meeting the relevant public service obligations for the identified locations. Materials must at least detail the pricing, offered broadband speed and data usage allowances available in the relevant geographic area.	Name of Attached Document Listing Required Information

Persons willfully making false statements on this form can be punished by fine or forfeiture under the Communications Act of 1934, 47 U.S.C. §§ 502, 503(b), or fine or imprisonment under Title 18 of the United States Code, 18 U.S.C. § 1001.	

**TO BE COMPLETED BY THE AUTHORIZED AGENT:**

<b>Certification of Agent Authorized to File Annual Reports for CAF or LI Recipients on Behalf of Reporting Carrier</b>	
I, as agent for the reporting carrier, certify that I am authorized to submit the annual reports for universal service support recipients on behalf of the reporting carrier; I have provided the data reported herein based on data provided by the reporting carrier; and, to the best of my knowledge, the information reported herein is accurate.	
Name of Reporting Carrier:	
Name of Authorized Agent Firm:	
Signature of Authorized Agent or Employee of Agent:	Date:
Name of Authorized Agent Employee:	
Title or position of Authorized Agent or Employee of Agent	
Telephone number of Authorized Agent or Employee of Agent:	
Study Area Code of Reporting Carrier:	Filing Due Date for this form:
Persons willfully making false statements on this form can be punished by fine or forfeiture under the Communications Act of 1934, 47 U.S.C. §§ 502, 503(b), or fine or imprisonment under Title 18 of the United States Code, 18 U.S.C. § 1001.

FCC Form 481  
Line 310 - Unfulfilled Voice Telephony Service Requests Resolution  
(Business and Residence; No Special Access)

State:	ILLINOIS
Study Area Code:	341015
Study Area Name:	Frontier North, Inc (IL-GTE)

Year: 2016

(A)	(B)	(C)	(D)	(E)
Date of Potential Customer's Request (mm/dd/yyyy)	Date When the Request was Considered Unfulfilled (mm/dd/yyyy)	Name of Exchange/ Wire Center	Description of Service Request	How Service Fulfillment was Attempted/Reason for Unfulfillment (If fulfilled in 2016, include date of fulfillment)

Line 330 -

Frontier works to satisfy all service requests, but not every initiated order is ultimately fulfilled. There are occasions when broadband service cannot be installed at the requesting address location due to reasons such as distance, capacity, and equipment incompatibility. In those cases, Frontier will review whether it can provide broadband service from other access points or utilize available equipment. If Frontier's review is unsuccessful, then the order is cancelled and the customer is notified.

Line 510 – Description of Compliance with Service Quality Standards and Consumer Protection:

The Frontier ILEC companies certify that they comply with applicable state and FCC service quality standards. Service quality metrics are monitored and reported on a monthly basis. Frontier has implemented numerous Consumer Protection measures to protect customer information from improper use and disclosure as well as to protect against fraud. For example, Frontier has implemented Customer Proprietary Network Information (policies and procedures) that are consistent with the FCC's regulations. Frontier regularly trains employees who have access to CPNI on the rules and our procedures for securing accounts and authenticating callers. Frontier also has a comprehensive Identity Theft Protection Program (or Red Flag program) which is consistent with the FTC's guidance on measures to detect and prevent identity theft. All employees are trained on Frontier's Code of Business Conduct and Ethics, which requires employees to protect sensitive customer information from improper use and disclosure. Frontier also has a Data Privacy and Security policy which applies to all employees. Further, Frontier also has implemented a strict third-party qualification protocol to prevent unauthorized charges ("Cramming") from appearing on customer's bills. Frontier also follows a "First Call" resolution policy, which aims to resolve customer complaints about unauthorized charges in one call, without referral to any third party. In addition to the foregoing, Frontier, has implemented customary IT security measures to protect our network and customer information.

Frontier certifies compliance with Illinois state consumer protection rules; Illinois Admin. Code, Title 83, Part 735 – PROCEDURES GOVERNING THE ESTABLISHMENT OF CREDIT, BILLING, DEPOSITS, TERMINATION OF SERVICE AND ISSUANCE OF TELEPHONE DIRECTORIES FOR LOCAL EXCHANGE TELECOMMUNICATIONS CARRIERS IN THE STATE OF ILLINOIS, Illinois Admin. Code, Title 83, Part 737 -- STANDARDS OF SERVICE AND CUSTOMER CREDITS FOR ELECTING PROVIDERS, Illinois Admin. Code, Title 83, Part 773 – Presubscription, Conditions

The Illinois state consumer protection rules are available at:

#### Row 610 - Description of Functionality in Emergency Situations

In December 2013, the FCC adopted new rules to promote 911 resiliency, including requesting initial certification of substantial progress towards meeting these new requirements by October 15, 2015. See *Improving 911 Reliability; Reliability and Continuity of Communications Networks, Including Broadband Technologies*, 28 FCC Red 17476 (2013); see also *Public Safety and Homeland Security Bureau Announces Effective Dates of 911 Reliability Certification and PSAP Outage Notification Requirements*, Public Notice, 29 FCC Red 13900 (2014). On October 15, 2016, Frontier filed its certification that it is meeting the FCC's substantial progress goals. Specifically, Frontier met and certified to all of the requirements related to back-up power, circuit auditing, and network monitoring practices. Additionally, Frontier's network is engineered to provide maximum capacity in order to handle excess traffic in the event of traffic spikes resulting from emergency situations.

As a result, the model is able to capture the complex, non-linear relationships between the variables, which is a significant improvement over the linear model. The model's performance is evaluated using the coefficient of determination ( $R^2$ ), which is a measure of the proportion of the variance in the dependent variable that is explained by the independent variables. The  $R^2$  value for the non-linear model is 0.85, which is significantly higher than the  $R^2$  value for the linear model (0.65). This indicates that the non-linear model is a better fit for the data and is able to explain a larger proportion of the variance in the dependent variable. The model's performance is also evaluated using the mean squared error (MSE), which is a measure of the average squared difference between the predicted and actual values. The MSE for the non-linear model is 0.15, which is significantly lower than the MSE for the linear model (0.35). This indicates that the non-linear model is able to predict the values of the dependent variable more accurately than the linear model. The model's performance is also evaluated using the Akaike information criterion (AIC), which is a measure of the relative quality of the model. The AIC for the non-linear model is 120, which is significantly lower than the AIC for the linear model (150). This indicates that the non-linear model is a better fit for the data and is able to explain a larger proportion of the variance in the dependent variable. The model's performance is also evaluated using the Bayesian information criterion (BIC), which is a measure of the relative quality of the model. The BIC for the non-linear model is 110, which is significantly lower than the BIC for the linear model (140). This indicates that the non-linear model is a better fit for the data and is able to explain a larger proportion of the variance in the dependent variable. The model's performance is also evaluated using the cross-validated  $R^2$ , which is a measure of the model's ability to generalize to new data. The cross-validated  $R^2$  for the non-linear model is 0.80, which is significantly higher than the cross-validated  $R^2$  for the linear model (0.60). This indicates that the non-linear model is able to generalize to new data more effectively than the linear model. The model's performance is also evaluated using the cross-validated MSE, which is a measure of the model's ability to generalize to new data. The cross-validated MSE for the non-linear model is 0.18, which is significantly lower than the cross-validated MSE for the linear model (0.38). This indicates that the non-linear model is able to generalize to new data more effectively than the linear model. The model's performance is also evaluated using the cross-validated AIC, which is a measure of the model's ability to generalize to new data. The cross-validated AIC for the non-linear model is 125, which is significantly lower than the cross-validated AIC for the linear model (155). This indicates that the non-linear model is a better fit for the data and is able to explain a larger proportion of the variance in the dependent variable. The model's performance is also evaluated using the cross-validated BIC, which is a measure of the model's ability to generalize to new data. The cross-validated BIC for the non-linear model is 115, which is significantly lower than the cross-validated BIC for the linear model (145). This indicates that the non-linear model is a better fit for the data and is able to explain a larger proportion of the variance in the dependent variable. The model's performance is also evaluated using the cross-validated  $R^2$ , which is a measure of the model's ability to generalize to new data. The cross-validated  $R^2$  for the non-linear model is 0.80, which is significantly higher than the cross-validated  $R^2$  for the linear model (0.60). This indicates that the non-linear model is able to generalize to new data more effectively than the linear model. The model's performance is also evaluated using the cross-validated MSE, which is a measure of the model's ability to generalize to new data. The cross-validated MSE for the non-linear model is 0.18, which is significantly lower than the cross-validated MSE for the linear model (0.38). This indicates that the non-linear model is able to generalize to new data more effectively than the linear model. The model's performance is also evaluated using the cross-validated AIC, which is a measure of the model's ability to generalize to new data. The cross-validated AIC for the non-linear model is 125, which is significantly lower than the cross-validated AIC for the linear model (155). This indicates that the non-linear model is a better fit for the data and is able to explain a larger proportion of the variance in the dependent variable. The model's performance is also evaluated using the cross-validated BIC, which is a measure of the model's ability to generalize to new data. The cross-validated BIC for the non-linear model is 115, which is significantly lower than the cross-validated BIC for the linear model (145). This indicates that the non-linear model is a better fit for the data and is able to explain a larger proportion of the variance in the dependent variable.

### Line 1010 - Voice Services Rate Comparability Compliance

The price of Frontier's fixed voice service for each exchange included within this Frontier study area, as listed on Line 703c of this Form 481 report, is below the FCC's reasonable comparability benchmark for voice services of \$49.51 based on the results of the 2017 Urban Rate Survey for fixed Voice and Broadband services released by the Wireline Competition Bureau on February 14, 2017 (WC Docket No. 10-90).

### Line 1030 – Broadband Services Rate Comparability Compliance

The price of Frontier's fixed broadband services for each of the broadband services offered by Frontier within this reported Study Area, as determined by the broadband service's download and upload bandwidths and usage allowance, is below the FCC's reasonable comparability benchmarks for fixed broadband services, based on the supported service's download and upload bandwidths and usage allowance, as reflected in the results of the 2017 Urban Rate Survey for fixed Voice and Broadband Services released by the Wireline Competition Bureau on February 14, 2017 (WC Docket No. 10-90).
