**VIA ELECTRONIC FILING**

Ms. Marlene H. Dortch,  
Secretary  
Federal Communications Commission  
445 Twelfth Street, SW  
Washington, DC 20554

**Re: Ex Parte Presentation, Use of Spectrum Bands Above 24 GHz for Mobile Radio Services, GN Docket No. 14-177; IB Docket No. 15-256; RM-11664, WT Docket No. 10-112; IB Docket No. 97-95**

Dear Ms. Dortch,

America's wireless leadership in 4G LTE adoption and deployment has had an enormous impact on the U.S. economy—an impact that was made possible in large part by FCC action in making spectrum available via auctions that took place years before 4G LTE technology was ready for commercial deployment. Today, the Commission finds itself at the forefront of the next wireless technology revolution. As highlighted in the video linked below, CTIA urges the FCC to seize the current opportunity to make high-band spectrum available in July so that the U.S. can continue its world leadership in wireless. Action now will help ensure that the industry has the tools it needs to expeditiously deploy the next generation of wireless services for the benefit of consumers.
