TCPA

I am not sure what good this will do, the GOP and corporate America is trying to rewrite a congressional bill to suit their needs. In fact as I am writing this, I just received another robo call from some foreigner trying to sell me health insurance. Are you kidding me? The past 6 months I get at least one call a day from a robo caller. If you change this you will kill cell phones, no one will answer on the first call. They already send fake caller ids using our local area code.

The TCPA is a consumer protection statute, please continue it as a consumer protection statute. Don't bow to the corporate pigs.

If you do bow, then you will unleash billions of robocalls. Trust me, the backlash will be heard from Main Street America all the way to Congress. The GOP will be blamed. This just to save a few bucks.

Please save the TCPA and allow us to live without the onslaught of robo calls to our cell phones.

Thanks
